Case No. 08-01420 (JMP) SIPA

STIPULATION REGARDING DEPOSITION DESIGNATIONS

Lehman Brothers Holdings Inc.; James W. Giddens, as Trustee for the SIPA liquidation of Lehman Brothers Inc.; the Official Committee of Unsecured Creditors of Lehman Brothers Holdings Inc. (collectively, "Movants"); and Barclays Capital Inc. ("Barclays"), hereby stipulate to the following:

- 1. As part of their case in chief, the Movants designated selected deposition testimony from 18 witnesses: Paolo Tonucci, Alex Kirk, Michael Klein, Victor Lewkow, Edward Rosen, Michael Keegan, Stephen King, Gary Romain, David Petrie, Marty Malloy, Paul Exall, Alvin Brown, Robert Messineo, Alastair Blackwell, James Hraska, Nancy Denig, Anson Frelinghuysen, and Christopher Kiplok. Barclays counter-designated selected deposition testimony from those same 18 witnesses.
- 2. On June 14, 2010, the parties submitted to the Court full and accurate copies of the designated and counter-designated testimony from the witnesses (the "Designated Testimony"), as well as a chart cross-referencing the deposition exhibit numbers referenced in the Designated Testimony to Movants' and Barclays' trial exhibit numbers (the "Exhibit Chart").

The Designated Testimony and a revised version of the Exhibit Chart are attached hereto as Movants' Exhibit 719. The parties expressly reserve any and all pending objections to any such exhibits that have not yet been admitted into evidence.

3. The parties will meet and confer to establish an efficient procedure to determine any objections to the Designated Testimony. Any objections that cannot be resolved between the parties will be brought before the Court for resolution, at the Court's convenience. Subject to any objections that are upheld by the Court, the Designated Testimony will be entered into evidence.

You have to add to that the fact that the holding company had filed and so the coverage of the desks was also impaired. I don't think that there would be every trader turning up and re-marking his book. So there was great difficulty in just creating the P&L and in being able to track the movements. HIGHLY CONFIDENTIAL - A. KIRK that's not what governs, that's basically the topics you covered with McDade on Thursday night.

So here you are in a meeting with Lowitt, O'Meara, Reilly and Tonucci. Do you learn more at the meeting about the nature of the help that you're going to have to give?

- A. They broadly outlined the first transaction. That was a quick summary. Then we discussed an issue that had come up earlier that morning around JPMorgan as our clearing bank shutting down Lehman's DTC account and what effect that would have on the transaction as planned.
- O. Now, you referred to -- you said they broadly outlined the first transaction. By the Friday morning, is it your understanding there's a second transaction, a subsequent transaction?
 - A. By the time we had this meeting --

2 were held at JPMorgan. There was a -- and 3 JPMorgan had a dispute of some sort about the

4 transfer of the repo with Barclays, which was

5 described to me by Mike Keegan, and in addition 6 to that, they shut down Lehman's -- they closed

7 down Lehman's DTC account, which led me to

8 believe that JPMorgan would not cooperate and 9 transfer the aforementioned securities to 10 Barclays on that Friday.

Q. When had you spoken to Mike Keegan?

A. I got up and I went to the office about 5 A.M. and I ran into him about 5:30 in the morning.

Q. Had you met Mr. Keegan before?

- A. I had met him the week before during the due diligence process.
- Q. So you say "they," that's some combination of Lowitt, O'Meara, Reilly and Tonucci, broadly outlined the first transaction to give you a quick summary?
 - A. Yes.

Q. How did they summarize -- tell me what you remember about their broad outline of the first transaction, the quick summary that they

Page 56

HIGHLY CONFIDENTIAL - A. KIRK gave you.

A. They summarized it as a purchase of the building, purchase of assets, and an assumption of this 4 billion, 4 and a quarter billion dollars in liabilities.

That discussion ended very quickly because of my belief that that transaction, given what had just transpired -- what I had learned from Keegan and the action that JPMorgan had taken, that I believe that they would act as a hostile party towards the closing of this transaction and that whatever had taken place before was irrelevant.

- Q. Did Mr. Tonucci tell you anything other than there was an assumption of liabilities in an approximate amount of 4 and a quarter billion for compensation of payables?
- Q. Did you have any knowledge as to how that number came to be determined?
- A. No. I was not concerned with that part of the transaction.
- Q. I'm sort of away from the Friday meeting for a moment.

A. No.

- Q. At any point did you come to an

- transaction was outlined to you by Tonucci,
- 9 O'Meara, Reilly and Lowitt, or some combination, did you have an understanding as to where the 10
 - assets would come from to fund those assumed liabilities?
 - A. I believe there was a schedule,
- 14 one-page schedule, which I think you have, that 15 broadly gave an asset and liability balance 16
 - sheet.
 - Q. Have you ever seen that schedule?
 - - Q. When did you first see that schedule?

Sometime late in the afternoon between 3 and 4, Ian came into a meeting where I was about to start a phone call with Bart, the Weil Gotshal lawyers on the phone, and I was sitting in the room with Mark Shapiro and I think it was Jim Seery and the Barclays, again, Diamond, Ricci, Klein and Keegan, and Ian came in and he said there's a there's a schedule of assets that we have that are unencumbered. I believe the number was \$1.9 billion of marked value. In addition, he said there might be value in our 15c3 margin, which at the time I remember that specifically because I was like, "Gee, what's that? I've never heard of that." So he said there might be value there, I don't know yet, and there might be others. So we said to Ian, well, get us a schedule of what's in the 1.9 billion in the I think he referred to it as being in the box unencumbered of these unencumbered assets, i.e.,

Therefore, other assets, unencumbered assets, capable of delivery had to be found? A. Right. Q. It was in the billions, but for your for the purposes of what you were doing, you didn't really need to know the number, you just needed to know the problem had A. Right, I was not the one who was going to solve those specific issues, so that was someone else's job. Q. Was anyone other than Lowitt involved in the particulars of solving the problem? A. I don't know the answer to that. Q. Did you ever learn whether Lowitt enlisted others in the task of finding unencumbered assets?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	unencumbered assets were located that could be transferred to Barclays? He said I don't know how I'm going to 4 4 5 5 know, this is the -- these assets are even put a value on this of any positive number. 6 6 Q. Describe for me as best you can the harder to value than what we already have. I 7 7 don't even know what these are. I specifically conversation about that topic and who said what. 8 8 A. Ian came in. He delivered this -- he remember there being residential mortgage 9 9 residual interests and things like IOs and some said -- we started the conversation with Ian 10 0 delivering the list of assets, and he handed it very illiquid aged positions in high-yield and 11 1 distressed debt. I don't specifically recall to Keegan -- he handed out probably five copies. 12 Most people were just staring at it saying 2 what else it was, but I do recall the list was 3 13 nothing. a -- there was a reason why there was nobody 14 Mike looked at it and said, you know, 4 financing those assets and it was because they 5 were the most illiquid and hardest to value 15 I -- what's this asset? What's that asset? I 6 16 securities that Lehman Brothers owned on its think Ian may have answered specifically if he 17 7 knew what the nature of those assets were, balance sheet. 18 because in like residential mortgages you have 8 Q. And when they make that agreement, are 17 17 Q. Okay. And did you have a sense after you present? Was that at this meeting? L8 18 this conversation, Mr. Lowitt reports on the 19 A. Yes. 19 15c3 assets and the unencumbered assets and 20 Q. And tell me what was said in that 20 Keegan says, I can't value those and then the 21 21 agreement's made, well, we'll take them because regard. 22 A. That, all right, we don't know what 22 there may be some value, whether after that 23 they're worth. They might be worth something, 23 point there were additional searches for value? 24 so we want them. And Bart was on the phone, he 24 Do you know one way or the other? agreed -- he agreed to that, and I think that 25 A. I don't recall one way or another. I

Page 110 Page 111 HIGHLY CONFIDENTIAL - A. KIRK 1 HIGHLY CONFIDENTIAL - A. KIRK 1 2 2 don't recall what the whole -- I recall 15c3. So I recall those two. I don't recall 5 the deal looks like. It's got the 45 billion, 6 if there were other categories discussed during 6 it's got the, on the asset side, it's got this 7 that meeting. 7 1.9, it's got 15c3, it may have had, you know, 8 8 other components to it. Q. You said a moment ago that Lowitt, 9 when he reported on the 15c3 piece, he put that 9 Bart agreed, Ian and Bart agreed that at about 1.9 billion? 10 10 these were the components on the assets side. 11 A. That was the marked value. 11 It had the assumed liabilities. They agreed 12 12 Q. Of marked value. And that there was that those were the assumed liabilities that 13 13 were going to agree, I don't remember the exact some value, but -- of what was in the box, but 14 14 numbers, and they said, okay, do we have an he didn't know what it was? 15 15 agreement? Barclays said yes. Ian was going to A. It was some value in 15c3, but he 16 16 go codify that, I believe, and talk to Bart. didn't know how much there would be. 17 Bart was in a car with Weil lawyers on 17 Q. So when that meeting ended, did you 18 18 his way to bankruptcy court. I think so, yes, that's what I mean. 24 that number? O. Did Mr. Klein say anything about this 24 25 A. I think Ian was putting together a 25 process adding additional value for Barclays? Yeah. And that project was Ian's 5 should not accept this deal? project, not mine. I wasn't -- I was an 6 6 7 A. Klein recommended that they accept the observer to this part of the process. 7 Q. What was Ian's manner in this meeting? 8 deal if -- when they got the additional, all the 8 9 additional collateral. 9 I mean, it's a tough week for everybody, but Q. I don't mean this to be sarcastic. I 10 what's his demeanor? 11 just can't come up with another way of phrasing 11 A. He hadn't slept in a week, so he was a 12 12 little harried. We're looking around for all this 13 Q. Did Ian identify other potential additional value and your memory is not clear on 14 sources of additional value that he had looked 15 whether there was a target or not? 15 at apart from the box and 15c3? 16 A. Yeah. 16 17 Q. Framed that way, what was the project 17 MR. HUME: Objection. Asked and 18 here? Was it to go find everything else and 18 answered. 19 turn it over, or was it to find some, some 19 Q. You can answer. 20 identifiable bucket of value until Barclays 20 A. No, he, as I said, he may have, but I 21 said, yeah, that's enough? Do you see the 21 didn't -- I don't remember. distinction I'm making? 22 Q. You don't remember, then, any A. Yes, it's -- the project was the 23 particular other sources that he might have 24 second, not the first. 24 discussed? Q. Okay. So the idea was there would be 25 A. No, I don't.

Q. Okay. Do you know the basis of the estimated liabilities? You told Mr. Hume that you knew that the liabilities for comp and cure were estimated in some way. Do you know the basis for the estimation?

HIGHLY CONFIDENTIAL - A. KIRK

- A. I assume that the basis was -- I don't know the estimation. I knew it came from our Finance Department.
- Q. And your understanding at the time on the Friday when you were looking at this was that those were estimates based upon Lehman's books, correct?
 - A. Upon the work that Lehman had done.

Certain, you know, liabilities only come up in the nature a transaction like this, right? So you cancel contracts you have liabilities. So they would be contingent and necessarily not necessarily on your books prior to doing an acquisition like that.

So the -- it's -- it's not -- it's not completely -- it wouldn't be completely just what was actually recorded on the books. There would also be other liabilities that could be

10 Page 211

HIGHLY CONFIDENTIAL - A. KIRK triggered by the transaction itself.

Q. And back to this issue of a viable purchaser, if it had been announced in addition to the other components of the deal that -- withdrawn.

You understood the assumed liabilities component of the deal to be a cost that Barclays would have in the transaction, correct?

- A. Correct.
- Q. If it had been publicly announced that the \$2 billion cost for compensation had been deliberately inflated by a billion dollars, that in your view would lower the actual cost for Barclays, correct?

MR. KELLEY: Same objection.

- A. If --
- Q. If it --

A. If the answer is if it was inflated, it would lower the cost, the answer is yes, that's factual, I think.

Q. If it had been announced in addition to other components of the deal that the assumed liability for compensation was deliberately inflated by a billion dollars, do you have a

view as to whether that might have attracted other viable purchasers?

A. The market was so uncertain and there was so much financial stress in the list of potential purchasers that I'm not sure there was anybody who could have executed it no matter what they thought the gain was because the market would have viewed it as too risky, so to speak, and too strategically risky in many ways and too risky from a financial standpoint to approve them for any board to approve it.

- Q. In your view --
- A. No matter what the gain was.
- Q. Sure. And in your view, was there at any point where additional value in the deal might have attracted other viable purchasers?

MR. HUME: Objection. Asked and answered.

- A. None with the time to actually execute
- Q. And what was your role in determining whether or not there were other actual viable purchasers?
 - A. I didn't have a role in that.

HIGHLY CONFIDENTIAL - A. KIRK

Q. Did you have any role at all in that?

A. No, that was the role of the FIG, the FIG bankers, Financial Institutions Group.

MR. GAFFEY: Thanks. Nothing further. THE WITNESS: Okay.

MR. ROTHMAN: One question.

MR. HUME: Objection. Vague and ambiguous.

MR. KELLEY: Asked and answered, too.

- A. I don't know. Did you say is it fair to say I don't know the terms?
 - Q. You don't know, yes.
- A. I only know it was described that there was 250 million put into the DTC account. I don't know the full terms. As I said, there may have been other terms that I was not aware of.
- Q. You don't know, beyond that 250 million that we discussed, you don't know one

Page 42

HIGHLY CONFIDENTIAL - M. KLEIN between the discussions that Barclays had to have with all of their own regulators to get sign-off to do anything, walking into this situation, should it be something that should be done.

And then, third, and I'm sure there were other things as well, but how do you protect yourself from all of the risks that could emerge. It's one thing to try to make a transaction and fail. It's another thing to make a transaction and fail. And obviously Barclays had a very big global franchise that they would be putting at risk. So that was the, if you will, morning.

We then went over to Lehman's building, the Seventh Avenue building, sometime in that afternoon and began to understand what potentially could be achievable. I think the -- because there was no understanding of what a, quote, transaction was, it was fairly clear that, when we walked over, we were hoping to be able to effectively see if there was a way to do business with the Lehman people and do business as Lehman.

Page 43

HIGHLY CONFIDENTIAL - M. KLEIN

That was the hope behind it, beyond which there was very limited knowledge. There was a substantial amount of noise in the marketplace because the markets had dropped dramatically and there was a view that assets -- that Lehman was just hemorrhaging assets so that no one knew what would be left, if you will, when we got over there, and then we went over to the meetings at Lehman.

Q. And before you went over to the meetings at Lehman, what, if any, parameters did Barclays come up with to answer the question of how it would protect itself?

MR. BERNICK: Again, I know that Mr. Gaffey will concur with this. He's really asking these questions of you for what you know. So you're not here representing Barclays. You're here just being Michael Klein. Subject to that, what he's asking you about is what you know of about that question.

Q. Just I'll restate the question just so we can be efficient today.

MR. BERNICK: Okay.

Page 44

HIGHLY CONFIDENTIAL - M. KLEIN

Q. At no point today do I want you to give me anything other than your personal knowledge, and I agree with Mr. Bernick: You're not here as a representative of Barclays. I'm not asking for the history, the global history of the transaction. I'm asking for what you know, what you saw, what you remember.

MR. BERNICK: And the only reason I kicked off into that is because you asked him how did Barclays come up or what parameters did Barclays come up with, and it sounded like it was a bit broader.

Q. Let's assume, sir, so I don't have to say it ever time, that all my questions begin with "to your knowledge."

So, to your knowledge, what parameters did Barclays come up to address the question of how it would protect itself?

A. Again, it's not very easy for me to reconstruct what at any moment in time even to my own knowledge existed. I do know that the concept of walking into the bankruptcy was one that there was a lot of trepidation and there was a sense that this was a -- if there was an

Page 45

HIGHLY CONFIDENTIAL - M. KLEIN

opportunity to have some of the right to do business in the areas that the -- that Lehman, old traditional Lehman, could offer, that would be great, but there was no appetite to take risk on things that could, if you will, come out of the woodwork or things that could bite. There just wasn't an ability to do that. That window, if you will, of being the whole owner of a, if you will, a business and a big balance sheet, the whole element, that was the weekend and had passed.

Q. Did Mr. Diamond express to you a view at that time that Barclays would not be willing to pay a premium or market price -- I beg your pardon. Did he express -- let me restate that question.

Did Mr. Diamond express to you a view that Barclays would not be willing to pay a premium or book value as opposed to a distressed price for Lehman's assets?

A. I don't recall, but I don't think there was an asset -- it wasn't an asset discussion. We were going over to discuss how to do a business transaction along with the

Page 46 Page 47 HIGHLY CONFIDENTIAL - M. KLEIN 1 HIGHLY CONFIDENTIAL - M. KLEIN 1 2 2 ability to do business at Lehman. I don't know one piece, as I recall. 3 3 of any parameters other than that there was no The second piece is, with that in 4 mind, what in fact can you do that is rapid sense as to whether there was going to be any assets. I mean, it wasn't a -- that wasn't the 5 enough to sustain anything of any value, because driver of certainly the -- either the roles or 6 the view was that if you couldn't do something quickly, there was not only no value in Lehman the conversations that I was party to. Q. So you go over to Lehman. Tell me as an entity on an ongoing basis, but there was 9 what happens there. Who meets with who? 9 going to be negative value because there's A. Lehman was -- there were quite a lot 10 always going to be liabilities, but there was of people at Lehman at the time, and again, in a 11 not going to be anything left for the business 12 2 similar vernacular. I didn't know many of them. itself. 3 3 So the early part was just discussing if any of them. There were a series of meetings, and I 14 was in fact there something that could be can't tell you who was in which meeting. The 15 achieved. At some point in that day, and I --16 6 Cleary lawyers were there and the Weil lawyers I'm not by any stretch a bankruptcy expert --17 were there. The Lehman professionals were let me be clearer, I'm not a bankruptcy expert 18 all in terms of my knowledge. there. The Barclays team were there. And for 9 19 the better part of -- the early part was a So there were definitions and question as to does this make any sense because 20 description amongst the lawyers of what 21 the clock is running out. The message had been potential paths could be taken, and there was if you can't get something done and have the 22 then a discussion of, if we were going to be 23 doing business as Lehman and step into the market believe something was going to be done, 24 your people, your counterparties, your operational business, if you will, of that North 25 American, how could you do that, how could you everything would be gone. So that was sort of Page 48 Page 49 1 HIGHLY CONFIDENTIAL - M. KLEIN 1 HIGHLY CONFIDENTIAL - M. Did you have a particular person on 3 3 The first -- one of the discussions the Lehman side who was your point person? 4 4 was, well, maybe we just don't have a A. Well, originally it was the Mark 5 5 transaction that has any assets at all. I mean, Shafir connectivity. That's the beginning. 6 this is a business purpose. If the assets are 6 From that point forward, after the Tuesday 7 getting taken by others in different ways, just 7 event, it, first of all, became far more fluid 8 8 do a business deal. And I think that's how I in the sense that there was an agreement out 9 9 learned that there had been the loan that had there; secondly, there was no particular 0 then been provided. 10 counterpoint at that point in time, and frankly, 1 The second part I was then asked to do 11 there was no need until that event occurred for 2 12 was to make a specific request of the parties at there to be a specific counterpart for me. The .3 13 Lehman to find more assets to rectify what had others may have had, because of executional 14 been the substantial movement and substantial 14 things that were taking place, other specific 5 reduction in the transaction that had taken 15 counterpoints, but I don't think I had -- I 6 16 place. don't think I could define a specific 17 .7 Q. Did you make the request of the counterpoint at that point. 8. 18 Q. Did you learn that Shafir left during parties at Lehman? L 9 19 A. I made the request. I'm not sure that the week? 20 20 it was just myself who made it, but I was part A. We did learn that Shafir had left 21 21 of requests that were made. And I don't know during the week, which obviously made for 22 who all was involved in sort of the receipt of 22 complexity in just in that dealing. 23 Q. So describe for me as best you can, those requests, but it resulted in a series of 23 24 conversations on that Friday morning prior to 24 please, how, in what circumstances the request 25 25 the court. was made for more assets? Page 88 Page 89 HIGHLY CONFIDENTIAL - M. KLEIN 1 HIGHLY CONFIDENTIAL - M. KLEIN 1 2 2 A. Well, I can only describe what I'm And I wasn't an evaluator of those assets or a 3 3 participant in those evaluations, but there was aware of, and what I'm aware of is that the transaction of a net book which had long and 4 4 that, if you will, debate over can we even get 5 5 shorts and could be managed over time had our loan proceeds back, so to speak, and there 6 6 migrated in the two ways I described: One. was a disagreement on that value. I was at one 7 7 point in a room where that was communicated substantial of those assets had been removed; 8 between different parties, that this -- there's 8 secondly, it wasn't clear at that stage what 9 assets had been necessarily moved into which 9 a disagreement on that. 0 10 I'm not sure if I'm answering the pockets, but perhaps most importantly, because 11 11 it was now a net asset purchase, it was a -- it question that you're --12 12 was putting all of your capital up against just Q. You were. Thank you. 13 13 A. The net effect of that was, because assets that you're buying in the midst of this 4 market calamity, the \$45 billion of capital, 14 there was no fundamental agreement and there was 5 15 both parties taking views, that the agreement which that was never -- that was never the 16 16 contemplation of the transaction, to my was struck that the loan against the assets were 17 17 briefing. To my briefing, we were stepping into essentially going to be equivalent in value, to 18 18 my understanding. the shoes of operating the business. 9 So the request was what do we do, and 19 The problem that that then created 20 20 the first question was, is that -- are those was, because Barclays was buying an ongoing 21 21 assets sufficient for that loan, and that was business and, in buying an ongoing business, had

In a general sense, and again, this is 3 had \$45 billion of capital as a purchase, which 3 recollection of a short window in a general 4 4 was not the original intention, as opposed to sense, they were trying to be supportive because 5 what was a purchase and then net assets that 5 once they announced the transaction, they were 6 came with the business. And they were put in a 6 trying to be supportive to preserve value of the 7 position where they would have to go back to 7 ongoing business. 8 both their board and their regulators with what 8 The specifics of that, quantums and 9 9 was a substantial hit, if you will, not just the form, as I said, I believe I learned --LO from the original transaction but to their 10 well, I know I learned a lot over that following 1 overall capital base. They couldn't close the 11 weekend, the 20th weekend, but prior to that, 12 12 transaction on that basis, as explained to me, no, I was not -- I was not briefed on that. 13 Q. Q. Yeah, I see the issue with value, valuation and it being somewhat judgmental. Let me ask you this: Did you have a view, did you have a view on the Friday once the bag -- you know, once the additional assets had been added, the 15c3 and the other assets, what the -- did you have a view of what the value was?

A. I have to be as clear as I can. I had never heard the term "bag of hammers." I never saw a list of securities. So I had no knowledge nor could I have, frankly, a whole lot of confidence into exactly what that would have resulted.

Page 154

HIGHLY CONFIDENTIAL - M. KLEIN spoke about before?

A. It was the splitting the difference on the -- I believe, but I don't know this for certainty, that there were two opinions, valuation opinions, both put forward by Lehman. It may well have been that the appraisers had to be agreed to by Barclays. I don't know the specifics, but the two opinions were then split down the middle.

Those opinions resulted in a reduction in value of the two buildings of 160 million. In addition, I think there was a waiving of this brokerage commission, but I think this -- I believe that this 160 refers to the splitting of the difference. The above was meant to be of kind of a summation of -- well, just of the challenges of the day to get over the finish line

Q. And the 3 billion that's referred to in that e-mail to is a reference to the additional assets searched for and found on Friday?

A. I would have to -- again, I don't recall the specific e-mail, but that which we

Page 155

HIGHLY CONFIDENTIAL - M. KLEIN found, the bag of hammers, 1.9, the 15c3, is entirely consistent with that.

Q. Does this refresh your recollection as to the amount that was added on?

A. I want to be clear. I don't believe anything was, quote, added on. I have said --

Q. Let me put a clearer question. You made that point before, and that's fair. Let me withdraw the question and rephrase it.

Does this refresh your recollection as to the additional value that was put in the deal on Friday?

MR. BERNICK: Go ahead.

A. You've used the term "value" a few times. I don't know what the value of, in particular, the bag of hammers, I don't know what the value of that was, but what I've said, there was the gap. We delivered the need to get more assets. This was a summation of what took place on the Friday.

Q. In your e-mail to Mr. Diamond you used the word "value" and you used it -- you say "3 billion more of value." Was that your view of what the value was?

Page 156

Page 157

HIGHLY CONFIDENTIAL - M. KLEIN

A. I couldn't have a view specifically of the value because I don't have the -- I didn't have the analytics of the value and I never saw the 1.9. It was a reference made to us in terms of what the value was. The reference is when someone says you're getting 1.9 billion of securities, that it's 1.9 billion of securities. That's just not something that today or then I could independently verify.

EXAMINATION BY

MR. TECCE:

Q. Good afternoon, Mr. Klein. My name is James Tecce. I am an attorney at Quinn Emanuel and we are counsel to the Creditors Committee.

Going to September 19, the day of the sale hearing, I believe when Mr. Gaffey was asking you questions earlier, you referred to a sidebar that took place during the sale hearing that you did not participate in, correct?

A. There was a reference -- are you referring to the e-mail discussion?

HIGHLY CONFIDENTIAL - M. KLEIN

- Q. No, no, no, I'm referring to the sale hearing -- let me back up for a second. Did you participate in the sale hearing where the transaction was presented to the bankruptcy court for approval on the 19th of September?
 - A. I sat in and watched, yes.
- Q. Okay. And did there come a point in time during the sale hearing where there was a sidebar discussion among Weil attorneys and creditor attorneys, as you understood?
 - A. I believe so.
 - O. Okav.

A. I believe there was a sidebar amongst the Weil attorneys, other attorneys, and interested parties broadly as a -- I don't believe that it was restricted to attorneys. It was interested parties fully being briefed, as I understood it to be the case, but I don't know all the people that were in the room. But it was a fairly broad briefing on what had been the transaction.

Again, I don't know, just to respond to your comment about lawyers and lawyers, I think it was far broader than that.

Page 158 Page 159 1 HIGHLY CONFIDENTIAL - M. KLEIN 1 HIGHLY CONFIDENTIAL - M. KLEIN 2 2 question. O. Okay. And to be clear, you did not 3 3 participate in that discussion, correct? MR. TECCE: I'm not asking who's on the committee. I'm asking if he ever had a 4 A. I don't believe I did. 4 5 5 conversation with their advisors. Q. Okay. Did there come a point in time 6 during the sale hearing that you participated in 6 MR. BERNICK: But if he doesn't know any discussions with the advisors to the 7 7 who their advisors are or he doesn't know 8 Creditors Committee, their attorneys, their 8 whose on the committee, he can't answer the 9 9 financial advisors? question. I'm not saying -- he may well 0 A. Not during the sale hearing that I'm 10 know. 1 aware of. 11 MR. STERN: James, in other words, he 12 2 Q. Did you have an understanding 25 25 that Houlihan Lokey was the financial advisor to lawyers are, then he can answer the Page 160 Page 161 1 HIGHLY CONFIDENTIAL - M. KLEIN 1 HIGHLY CONFIDENTIAL - M. And did you know that Milbank 8 Tweed was counsel to the Creditors Committee? 8 And I remember specifically that 9 A. I don't have a recollection of 9 meeting only because I drew on a manila folder 10 10 such as that with a green marker the components specifically of Milbank Tweed. I don't. Q. So, prior to the sale hearing taking 11 of both this 45 and the assets that were then place, did you engage in any conversations or 12 collateralized against it, separately and discussions with Houlihan Lokey or Milbank Tweed 13 distinctly, the other, quote, moving pieces in concerning the sale transaction? 14 what I understood to be the fund flows. A. I can -- to be very precise, there was 15 It was not a very long conversation a series of events at the Weil Gotshal firm 6 16 and I can't tell you who other than I think Harvey Miller was in because I got grabbed in where there were a series of meetings in meeting 18 rooms. I don't recall the specific dates of there, but I specifically went through, again, those meetings or meeting rooms, but there was 19 only because I grabbed a manila thing and there one evening in which there was a creditors 20 was a green pen and I just have that particular committee of some form meeting. And I did it because the Weil firm I did get pulled into a side room by a 23 asked me to, and as I understood it, there was group of people that included some of the Weil 24 some form of ongoing creditor committee meeting that I wasn't a party to. That's my only lawyers, and again, I don't recall specifically

And did this take place before 3 3 Beyond those facts, as to which date and who the or after the sale hearing? 4 4 people were, because I don't -- I don't think A. I don't have a recollection of what --5 they introduced themselves to me, I'm fairly I just don't have a recollection of the -- it 6 certain they didn't introduce themselves to me, was at Weil, but I don't know -- I don't have a 7 I don't have more of a recollection than that. recollection. 8 Q. Okay. And so let's just back up for a 9 Q. Is there any reason --9 second. I believe that you referenced a larger A. Did you -- what was your understanding .5 where the Creditors Committee was meeting. So I 15 of what the larger meeting -- of who was in .6 sort of know -- I have a picture of the 16 attendance at the larger meeting? 17 whereabouts, I just don't remember the day. A. Something to do with the creditors. I 18 Q. Do you have any reason to believe that 18 don't have more detail on it than that because I 19 19 it took place prior to the sale hearing Friday didn't know the people. There was just a big 20 20 room that supposedly there was the creditors hearing? 21 21 A. Again, I don't have a recollection of meeting and a phone call. I was asked to be 22 which -- I don't have a recollection of which 22 pulled into this other side room -day it happened. I know specifically what I 23 23 Q. Okay. I believe you mentioned Mr. Miller in 4 funds on a manila folder and answer one or two the side meeting. Do you remember anyone else 5 5 questions. I don't want to speculate how long 6 who attended that meeting, the names of anyone 6 it was. I don't think it was a enormously long 7 7 else? meeting. 8 8 A. It was -- there were people floating Q. Do you remember the substance of what 9 around, you know, from Barclays and from Cleary 9 was discussed with respect to, you know, the 10 10 Gottlieb and people floating around from the 11 Weil firm as well. I just don't know -- people 11 A. It was the principal elements were the 12 were coming in and out of some of those rooms, 12 45 loan, the assets that were roughly viewed as 13 13 so I just don't know. I just remember Harvey equivalent to that, the, if you will, bag of 14 asked me to explain it, so that's the only 14 hammers and -- I'm sorry, let me be more 15 reason why I know Harvey was there. 15 precise. 16 16 Q. It could well have been that the agreement was other people, because there were other senior people like Jonathan Hughes around. But as I understood it, that was agreed to, that above and beyond that, some minimum number, it could in fact go back to the estate. That was very late in the process. I don't remember specifically when, but it was very late in the process.

- Q. And do you have a recollection, Mr. Klein, of where you were when this discussion with Mr. Cox and Mr. Miller took place?
- A. You know, I want to say again, you have now done this twice to me. I have not said that there was a conversation between Mr. Cox and Mr. Miller.
- Q. I'm sorry. I did not mean to represent your prior testimony. I think I must have misunderstood your answer.

Page 211

HIGHLY CONFIDENTIAL - M. KLEIN

- A. I believe, but I don't know for sure, that the request from Mr. Miller came somewhere at the Weil offices, but I don't -- I don't have a specific recollection, and I just want to be clear that was a request to me that I then passed on to the people at Barclays because it was their decision.
- Q. And you say late in the process, so can we at least narrow it down to a date? Was that request of Mr. Miller to you, was that on the Sunday, the 21st?
- A. My apologies. I don't know the date. I don't -- I don't know the date.
- Q. Was it sometime prior to the closing of the deal on Monday morning?
- A. Oh, it certainly was prior to the closing. I don't -- I'm not aware of -- it certainly was prior to the closing.
- Q. And just to bookend it, can we agree that that conversation took place sometime between the bankruptcy court hearing on the 19th and the closing on the 22nd, is that fair?
- A. I don't, I don't, I really don't. As I think I've said, the -- I don't think the 15c3

HIGHLY CONFIDENTIAL - M. KLEIN assets came into play until sometime when this issue of the broader set of asset problems after Tuesday occurred, so it's clearly after that, and it's clearly before closing, but I just -- I just don't know the specific date. And I would help you if I could remember, but I don't.

- Q. I understand, sir. Forgive me if I'm getting a little repetitive, can you be as precise as possible about the terms of the request from Mr. Miller to you?
- A. I've given you what I know. I don't -- I don't have a recollection above and beyond that.
- Q. And just so I understand your testimony, sir, Mr. Miller asked you whether Barclays would agree that if there was more than a certain figure, perhaps around \$750 million, available under c3, then that would be returned to the LBI estate; is that accurate?
- A. You are using very precise terms and I want to be very careful because (A) this was a year ago or more -- a year ago, and there was a lot of moving pieces. I don't specifically know who was involved in the conversation other than

HIGHLY CONFIDENTIAL - M. KLEIN Harvey Miller.

I only know that it was a request that, above and beyond what had been represented as being assets that were certainly going to go, which was this e-mail, if there were more, could those come back to the estate, and I said it's not -- that's not something that can be done.

Now, I don't know -- not something I can do. I don't know who else was in the room. It would be -- there was virtually no situation that I can recall, in fact, I can't recall any situation that I was in a room alone with Harvey Miller. So it would have been as part of some other grouping. And then a response was given, to my understanding, from Barclays back that that would be okay. But I don't -- I don't have a recollection beyond what I've just told you.

Q. Did you have an understanding, Mr. Klein, that the transfer of these moneys from Lehman to Barclays, the 15c3 assets, was conditional upon there being an excess beyond the regulatory requirement?

MR. BERNICK: Object to the form. I'm not objecting. I think the form of your

seller. There was a -- there was a provision that said that on a certain pool of positions, that we would be -- that Barclays would be acquiring at the closing, that if, as I recall -- and you know, without having the Agreement in front of me to look at the words, I always defer to what's in the contract.

But my recollection is that the -there was a provision that if within some period, I think it was a year, to the extent that Barclays actually sold positions -- not what their value was on a given date or the like, not as audit, not if they held positions, even if those positions increased enormously in value or if they went down in value.

But if with respect to some pool -and I don't remember the details of how it worked because that provision was later dropped, as you know. There was a provision that if -- with respect to some of those assets, if we -- if Barclays sold them during, I think, the first year, there would be some sharing of the -- of the profit compared to TSG Reporting - Worldwide 877-702-9580

what -- I forget what the base was exactly, as to what date the assumed valuation was.

So there was a provision for additional consideration potentially to flow to the seller.

Q. I'll show you the Asset Purchase Agreement in a minute and we'll spend some time with it today.

But is the provision that you described, is that fairly described as a post-closing purchase price adjustment provision?

MR. MORAG: Objection. Asked and answered.

A. Yeah, I have nothing more to say other than what I said on that subject.

Q. I'm not sure I have an answer to the question as to whether it is -- the provision you described is what you would describe, and I'm referring to Paragraph 4 of your affidavit, as a "post-closing purchase price adjustment provision"?

A. Well, with due respect, if you read my declaration, it says, "...a pre-closing TSG Reporting - Worldwide 877-702-9580

and/or post-closing purchase price adjustment provision relating to the valuation of the transferred assets and liabilities". This was not such a provision.

Q. So to qualify as a balance sheet transaction, in your view, the pre or post closing purchase price adjustment provision would have to relate to a valuation of the assets and liabilities? It's that last piece, "valuation of the assets and liabilities" that defines it as a purchase price adjustment provision as you meant it in your Declaration?

MR. MORAG: Object to form.

A. As I said earlier, to me a balance sheet transaction is when you later prepare --I'm not sure that the word -- I would say do a valuation from an accounting standpoint. As a balance sheet, normally you would prepare a balance sheet based on generally accepted accounting principles, have it audited and adjust the purchase price based on that.

O. Is there a reason such a mechanism was not included in the transaction at issue

TSG Reporting - Worldwide 877-702-9580 -Lewkow-

A. You know, I would -- I don't recall whether at any point in time, whether Lehman or its advisors requested such a provision. I just don't recall. Certainly if they did, it came and went very quickly in the discussions of the concept of the Asset Purchase Agreement. But I don't recall there ever being such a provision.

I would note that we were -- as everybody knew then and knows now, it was an incredibly volatile couple of days. The Asset Purchase Agreement was being negotiated on that Monday and Tuesday after Lehman had filed for Chapter 11 late Sunday night, early Monday morning.

And I think the idea that anyone had a wonderfully exact knowledge as to what the value of portfolio assets in particular were at that point in time, it would be amazing because there was a very uncertain value at that point in time.

Q. Did Cleary Gottlieb play any role in the negotiation of the transaction with regard to arriving at a valuation of the

Page 150 Page 151 -Lewkow--Lewkow-2 2 A. I'm trying to figure out --Ms. Fife had, in describing the changes from 3 3 MR. MORAG: There was a the deal as reflected in the Asset Purchase 4 4 Agreement, how precisely she had put it in communication. 5 A. There was a communication about 5 describing those changes. And she had clearly 6 6 indicated that that cash wasn't in -- wasn't what we had heard from Harvey Miller and/or 7 7 others from Weil Gotshal that I described in going to be in the deal but again, nobody knew 8 8 my testimony, and that was discussed. precisely what it was. 9 9 And putting aside the conversation And so the alternative, since 0 that I had with the Barclays representatives, 10 nobody wanted to -- neither Weil Gotshal nor 11 when we got back and the discussion that I'm 11 Lehman nor Barclays nor the lawyers wanted to <u>2</u> 12 do anything inconsistent with what the Court testifying to resumed with the other side, we L 3 13 said, look, if there's no transcript, nobody had been told, there were two choices 14 remembers precisely what he said. 14 available, which was to wait until Monday, get L5 And so until we can get a 15 a transcript and see what, in fact, she had 16 16 transcript -- because she clearly had talked been told. And then, if necessary, go back to 17 17 about cash and there was, you know -- the the Court. 18 18 retained amount was not, was sort of cash that There were three choices. Just go 9 was free and available and not tied up in 19 back to the Court Monday morning or find 20 20 positions. It was just cash that we had been another solution. And the other solution was 21 21 led to believe at the time of the Asset the one that Barclays put on the table of 22 22 Purchase Agreement was totally free cash that saying, okay, we will take just the securities 23 23 they had somewhere, and that they were going portion, 760-some-odd million in securities. 24 24 to transfer as part of the Purchased Assets. And in the course of that discussion, Michael 25 And nobody knew precisely how 25 Klein said that if -- if for some reason you TSG Reporting - Worldwide 877-702-9580 TSG Reporting - Worldwide 877-702-9580 Page 152 Page 153 -Lewkow-1 -Lewkow-2 to the Court, had anybody seen a transcript by can't --3 And there was some conversation by 3 then? 4 someone at Weil about do we -- do we need SEC 4 A. Was there any discussion on Monday 8 before the closing concluded of getting the "subject to applicable law," or something to 9 that nature that ended up in the Clarification transcript or the tape to make sure the 10 10 Clarification Letter was consistent with the Letter. 11 And then Klein said, Look, if we --11 **Court's limitations or instructions?** 12 you know, we're giving up this billion dollars 12 MR. There was a 15 getting this 769 million in securities, and so 15 belief by all of the people that's discussed 16 we want to add language that says -- again, 16 that it was really important to get this deal 17 I'm paraphrasing, that if we can't get that, closed and announced before the market opened 18 you'll get us 769 million of securities of 18 Monday morning. I'm not sure of this, but I believe 11 I mentioned the employees. The 12 at least some of the press reports from people employees were very important to this deal. 13 who had been in the courtroom had indicated Barclays was not -- you know, all of this that the deal might close over the weekend or discussion we've had and this testimony has 15 would -- was expected to close over the been -- and I understand that, has been about 16 weekend. the financial assets. Barclays was not doing And so there was great concern that this deal to buy a portfolio of financial if, in fact, the markets opened Monday morning 18 assets. Barclays was doing this deal because 19 it wanted to buy a broker-dealer investment and we had not announced a sale, that people 20 would have thought the deal was falling apart banking business in the United States and was or had fallen apart, was never going to 21 prepared to take very substantial risks in 22 happen, or what the heck is the problem out their view in doing that. And I say "very substantial risks" there. And in the markets that we lived in, 23 not focusing particularly on the financial this was in the course of the days when the 24 papers were full of information talking about 25 assets but because of the fact that when TSG Reporting - Worldwide 877-702-9580 TSG Reporting - Worldwide 877-702-9580 Page 156 Page 157 -Lewkow--Lewkowpeople have bought investment banking firms in they may have known it as a fact, I don't the United States, they have often worked out know, but they assumed that really the 4 Barclays -- the best Barclays [sic] people, very badly. Because it is not only what you pay the ones you most wanted to keep were getting day one but it's can you make it work? Can other inquiries from competitors during the you get the employees to stay? Can you get the days, during Monday, during the prior week them integrated? Can you keep them happy so 8 over that weekend, etcetera, and it was 9 as to create value for your shareholders? And important that we keep -- that Barclays be 10 that's true in the best of days. able to keep the people together. 0 And I think of General Electric, 11 All of that went to the point that 12 the parties believed, both parties, that it pretty savvy acquirers as people would think. They had bought Kidder Peabody, spent a great 13 was really important to try to get this deal 14 announced before the beginning of the market deal of money and then spent a lot more money 15 5 over the next X years trying to make it work opening on Monday morning. and had lost a zillion bucks. suggested that if there was a concern along those lines, which we didn't share -- and I'll say only, my recollection is there was a question raised about it -- that we say to the extent permitted by applicable law and as soon as practicable after the closing.

And because the provision by its terms then raised a question about whether or not this value was going to be conveyed, because the reason this was in here and was the subject of discussion was that there was a significant erosion or concern about the erosion of value and assets that were contemplated to be delivered initially but were not available to be delivered, and that Lehman identified this as a source of value, and so we wanted to make sure that that value was conveyed.

And so as a result of this language, it made us think, well, fine, if you can't give us these 769 million of securities, give us those other securities of a similar nature and value.

That's my recollection of the origins of this provision.

Q. I'll show you a document we have previously marked as Exhibit 451. Have you seen that before, sir?

A. I don't recall that I necessarily saw precisely this. I do recall that there was a representation made that the SEC had approved as excess a certain level of value and that there was an e-mail. We thought that we were going to see an e-mail saying that. Instead, there was an e-mail, I recall, but which didn't involve --didn't come from the SEC, but reported that it was approved.

I don't think I have seen this particular document, and I can't say that I recall with precision the numbers for the allocations between cash and securities.

I don't think it was an ultimatum. I think people wanted to get the deal done, but I think there was a concern that letting another business cycle go by was just because we didn't know what was going to happen. I think this was the weekend where we had learned very late Sunday night that, you know, Morgan Stanley and Goldman Sachs had quite expeditiously become banks and people were worried and the hurry to do that was no doubt in part due to concerns. So I wouldn't say that it was a drop dead or an ultimatum or anything like that. It was that people realized it became more complicated and there was more noise that could interfere with the transaction the more time that elapsed. So we all, I think internally at Cleary regarded it as, put it this way, if the

KEEGAN - HIGHLY CONFIDENTIAL 1 2 2 Ouinn, Emanuel, Urguhart, Oliver & I joined in London as a chief operating 3 3 Hedges for the Official Committee of officer of the markets division of BZW 4 Unsecured Committee. 4 reporting to Bob Diamond. 5 MR. LAYDEN: Good morning. David 5 I did that job for two years until the formation of Barclays Capital in January 6 Layden from Jenner & Block for the 6 7 Examiner. 7 of 1997 -- sorry. January of 1999. And I was 8 8 the C -- sorry. It was January of '97. Sorry BY MR. TAMBE: Q. Mr. Keegan, by whom are you 9 9 about that. So it was 18 months as COO. Then 10 employed currently? 10 I was -- became the first CFO of Barclays A. Barclays Bank, PLC. L1 11 Capital when Barclays Capital was formed. I 2 Q. And how long have you been 12 did that job until November of 1999 and then I 13 employed by Barclays Bank, PLC? 13 returned to New York at that point in time as 4 A. I've been an employee of Barclays 14 the chief administrative officer for the 15 since July of 1996. But during that time 15 Barclays Capital operations in the US. I did 16 period, because of overseas assignments and 16 that until 2001 when I became the chief 17 things like that, I've been employed by a 17 operating officer for Barclays Capital's 18 number of various entities within Barclays. 18 credit trading and investment banking 19 19 Q. Starting in July of 1996 to the businesses. And that was the position I had 20 present, if you could just give us a broad 20 until I guess November '07. And at that point 21 21 overview of what your positions have been and became head of principal credit trading which 22 what your duties have been at Barclays. 22 is the job I currently have. A. Sure. In July of '96 I actually 23 23 Q. Just focusing on your current job 24 ioined BZW which was the investment bank 24 and your prior job, so starting in 2001 25 25 subsidiary of Barclays Bank located in London. through the present, starting sometime in 2001 Page 9 1 1 M. KEEGAN - HIGHLY CONFIDENTIAL M. KEEGAN - HIGHLY CONFIDENTIAL 2 2 it sounds like you were head of credit trading business. Then I took on 3 3 responsibilities for managing our loan trading? A. No. Chief operating officer which portfolio which is the portions of the loans 4 4 5 in Barclays Capital it's different things to 5 that we would make to clients that we would 6 different people. All right? So I worked for 6 retain on our balance sheet, managing that. 7 7 an individual named Grant Kavalheim. Took on responsibility for our distressed 8 8 Q. How do you spell that last name? proprietary trading business. And, finally, 9 9 A. It's K-A-V-A-H -- let me write it more recently, our real estate business. 10 10 Q. And if I understand the change in out. 11 MR. STERN: We can look it up. 11 the nature of your duties starting in November 12 12 O. Grant was the first name? 2007, you specified that date as the date at 13 13 A. Yeah. Grant. which you became head of prime credit trading? 14 O. All right. 14 A. No. Principle credit trading. 15 O. Principle. 15 A. K-A-V-A-L-H-E-I-M. 16 16 A. So Grant departed the firm. All 17 A. So Grant was head of trading and 17 of the trading businesses rolled up to Jerry 18 18 investment banking. I was his COO and as his del Missier. Jerry del Missier had another 19 19 individual by the name of Justin Bull who was COO, yeah, I had a bunch of different duties 20 in charge of planning, budgeting, execution of 20 his chief operating officer. So basically my 21 21 any strategic plans that we wanted to chief operating officer duties for credit went 22 22 implement. I took on responsibility for away and I was left with what was my trading managing a number of businesses for him which 23 23 and risk management supervisory 24 included our -- initially a business called 24 responsibilities. 25 risk finance which was a credit arbitrage Q. Okay.

Page 10 Page 11 M. KEEGAN - HIGHLY CONFIDENTIAL 1 M. KEEGAN - HIGHLY CONFIDENTIAL 1 2 2 A. And I was renamed as head of Do you still do all those --3 3 principle credit trading. manage all those types of trading? 4 Q. So starting with November 2007 4 A. Yes. 5 through to the present if you could describe 5 Q. So that's included within 6 who you directly reported to. 6 principle credit trading. 7 A. November 2000? 7 A. Yeah. What principle credit is is 8 Q. Seven. 8 any risk that we are taking as a firm in the 9 A. Seven? 9 credit space in a non-market-making capacity 10 is supposed to roll up into principle credit. Q. Yeah. 11 A. As of November 2007 until today I 11 It doesn't but... L2 12 directly report to Jerry del Missier. Q. Other than the duties you have 13 Q. And who are the folks who directly 13 with respect to the principle credit trading 14 report to you, if any? 14 business in the past twelve months have you 15 A. Today it's Fred Orlan. It is an 15 been involved in any strategic initiatives 16 16 individual named Rene Canezen. It's an by -- taken on behalf of Barclays? 17 17 individual named Matt Barrett. An individual A. I was involved in the Lehman 18 18 acquisition, yes. named Haejin Baek. And I'm pretty sure 19 19 that's -- I'm trying to think. That's it Q. And other than the Lehman 20 right now the way we're organized. 20 acquisition, have you been involved in any 21 21 Q. Okay. When we were earlier other strategic initiatives, acquisitions, 22 talking about some of the work you did when 22 dispositions, things of that nature? 23 you were working with Grant you'd mentioned 23 A. Nothing major. 24 managing loan portfolios, distressed 24 Q. Broad terms, if you could just 25 25 proprietary trading, et cetera. describe your involvement in the Lehman Page 12 Page 13 M. KEEGAN - HIGHLY CONFIDENTIAL 1 M. KEEGAN - HIGHLY CONFIDENTIAL 1 2 2 corporate credit/debt positions. transaction. 3 3 And, you know, that process took MR. STERN: Jay, if it helps, I basically, you know, the weekend through -- I 4 have a September 2008 monthly calendar, 4 you know, just to keep the days of the 5 don't know -- 3:00 or 4:00 on Sunday when it 5 week in mind. I just put that up here 6 6 was determined that the trade wasn't going to 7 7 in front of Mr. Keegan. happen. 8 MR. TAMBE: That's perfectly fine. 8 Q. After that Sunday -- the Sunday 9 9 A. So my role I guess began Friday you're referring to is the 14th of September, 10 the 12th. And was one of the people who was 10 correct? 11 brought in to examine portions of Lehman's 11 A. I believe it was, yes. 12 12 Q. After Sunday, the 14th, did you balance sheet and operations in preparation 13 13 for a bid to buy Lehman Brothers from what have any further involvement? 4 looked like it was going to be the -- in fact, A. Yes, I did. 14 L5 the government at that point in time. 15 O. Okav. Q. And over the course of that next 6 16 A. On Monday, the 15th, somewhere 17 week, starting on the 12th going forward say 17 around 10, 10:30, 11:00 I got a phone call to 18 ten days until the 22nd of September, if you 18 show up to the conference room at Lehman 19 19 Brothers' offices on the 32nd floor and to could give us a little bit more detail in 20 20 terms of what tasks you were doing in await instruction. 21 21 connection with the Lehman transaction. Q. And did some instructions arrive? 22 A. Sure. I had responsibility 22 A. They did. I believe it was -- I'm specifically for looking at the commercial 23 not sure if it was actually but I believe it 23 24 real estate portfolio, their loan portfolios, 24 was Richard came in and told us that we had an 25 their private equity investments, and their opportunity to buy the US operations of Lehman

Page 14 Page 15 M. KEEGAN - HIGHLY CONFIDENTIAL 1 M. KEEGAN - HIGHLY CONFIDENTIAL 1 2 2 Brothers I guess prior to bankruptcy So it basically came down to, 3 3 within my world, what I looked at, was the because -- at least with respect to the broker/dealer. The broker/dealer was not 4 4 corporate debt securities that were on the 5 filed on that Monday morning. 5 books of the broker/dealer for the most part. 6 6 Q. And so after you were told about Q. And just to be clear on what you 7 that opportunity what involvement did you have 7 mean by corporate debt securities, what do you 8 in those efforts to purchase Lehman's 8 mean by that? 9 A. Commercial paper, bonds, credit 9 operations? 10 0 A. So I was asked to take a look at, link notes. Any other, you know, security 11 11 you know, the potential assets that we were instruments that they might have housed in 12 broker/dealer that, you know, involved 12 buying within the categories that I explained 13 13 to you before. And it did not include any corporate credit risk. L 4 commercial real estate because our board told 14 Q. And for this asset class, 15 us we weren't eligible to take over any 15 corporate debt securities, would you typically 16 16 commercial real estate. It did not include be provided with a list of CUSIP numbers, 17 17 identifiers for the securities that were held any private equity investments because during 18 the work we did over the weekend we determined 18 by the broker/dealer? 19 19 that the private equity investments were not MR. STERN: I'm just going to 20 20 something that we wanted to take. object to the form. Are you asking him 21 21 if he was? It says would you typically It did not include any of the loan 22 portfolios, should not have included any of 22 have been. 23 Q. That's fine. I could restate the 23 the loan portfolios, because that was another 24 asset category we determined we did not want 24 question. Are you provided with CUSIP numbers 25 25 out of the debt securities held by the to take. Page 17 Page 16 M. KEEGAN - HIGHLY CONFIDENTIAL 1 1 M. KEEGAN - HIGHLY CONFIDENTIAL 2 2 broker/dealer? portfolio or did you do other things as well? 3 A. Over the weekend we were. And 3 A. It was primarily that. I also was more or less coordinating the communication 4 then on Monday I'm not sure that we were given 4 5 a complete list again but we were shown -- it 5 internally between other individuals that had 6 was indicated what was on the books of the 6 responsibility for various parts of the 7 7 broker/dealer and I guess we had a list portfolio -- of Lehman's portfolio and 8 8 because I had determined whether we looked at analyzing it. And our team just -- and 9 9 it or not -- or didn't look at it over the that's -- no one said, Mike, you're -- you weekend. That was the first step. You know, 10 10 know, you're in charge. Just that I'm more 11 had we seen it before. We should have. 11 senior than the other guys. So I know -- I 12 12 And then for particular areas know Rich. I know Archie Cox. People like 13 13 where we identified over the weekend as being that. L4 problematic with respect to value or other 14 I worked on the -- securing -- we 15 15 concerns, yes, we were given a CUSIP -- we were going to make a DIP loan to Lehman for 16 asked for and were given a CUSIP list. 16 the week and looking at the collateral 17 So Lehman obviously hadn't planned 17 associated with the DIP loan and how much --18 on going bankrupt and they were totally 18 what collateral might be available for the DIP 19 19 unprepared for the whole process on Monday so loan and how much we might be willing to 20 20 it was a struggle to get any information quite provide. That was principally it. 21 21 frankly. Q. And the loan that you're referring 22 Q. And throughout that week, the week 22 to as the DIP loan was that, in fact, extended 23 of the 15th of September, was the focus of 23 by Barclays to Lehman? 24 your efforts limited to analyzing the 24 A. It was. corporate debt securities aspect of the 25 0. And in what amount?

Page 18 Page 19 M. KEEGAN - HIGHLY CONFIDENTIAL 1 1 M. KEEGAN - HIGHLY CONFIDENTIAL 2 2 A. I think it was \$500 million. I'm negotiating --3 MR. STERN: Excuse me. Excuse 3 not positive what credit finance determined. The collateral was Newburger Berman property. 4 4 me. I don't know if you -- if you 5 Q. And just to be clear, this DIP 5 completed your answer. 6 loan is different than the tri-party repo or King. 6 7 any other repo --7 THE WITNESS: Oh, the guys I was 8 coordinating with. Sorry. I thought 8 A. Absolutely, yeah. 9 Q. You said you were -- you played a 9 you were looking upward, not downward. 0 coordinating role to some extent during that MR. STERN: It's a gen -- just to 10 11 week. You mentioned two names. I believe you 11 clarify, it's a general question about 12 mentioned Rich Ricci. I think you mentioned 12 all the people he was coordinating with. 13 13 Rich but that was Rich Ricci? Not just the more senior people. 4 14 A. That's Rich Ricci, yes. MR. TAMBE: That's fine. 15 15 Q. And Archie Cox, right? Q. Let's go through the list of L6 16 everyone you were coordinating with. You got A. Yes. 17 17 Q. Who else were you coordinating to Mr. Clackson. Mr. King. 18 with during that week? 18 A. Right. So Stephen King was 19 19 A. Jonathan Hughes, our legal responsible for looking at all of the ABS and 20 counsel. A few conversations with Patrick 20 mortgage -- residential mortgage assets with 21 21 Lehman Brothers. Similar role to what I had Clackson. 22 22 Q. And who is Mr. Clackson? on the credit side. John Mahon took that 23 23 responsibility for, I guess you would call A. He's the chief financial officer 24 of Barclays. 24 them the rates, assets, government bonds 25 principally. Anything that they might have 25 Q. Were you involved at all in Page 20 Page 21 1 M. KEEGAN - HIGHLY CONFIDENTIAL M. KEEGAN - HIGHLY CONFIDENTIAL 1 2 2 done with repo would have rolled up to him. A. I wouldn't say I was negotiating 3 The exposures, if any, on derivative 3 the terms of the transaction but I was 4 4 involved in -- you know, I was also involved contracts. 5 5 Q. Anyone else in this coordination on Thursday. 6 6 Q. And you say you were also involved circle that you --7 7 A. That was pretty much it. There on Thursday. What do you mean by that? 8 8 was other people that -- like I said, I was A. So we struck a deal on Monday in 9 9 not in the coordination but I was working with effect as to what we were going to buy. And 10 0 our guys in credit on the DIP loan. A guy then -- you know, so I worked from, you know, 11 named Mark Manski and Ian Prior on that. I 11 at Lehman from whatever time, 10:30 in the 12 12 had conversations with James Walker. James morning, 10:00 to roughly 2:30, 3:00 in the 13 morning, Tuesday morning. Went and got some 13 was controller of the US. Another lawyer L4 named Jason White. Jason was working on the 14 sleep. Tuesday was more worried about other 15 L 5 DIP loan. And Gerard LaRocco I guess as well. things in our world than I was worried about 16 L6 And Gerard was working on putting a repo anything in Lehman's world whose world was 17 17 melting down. And more focused on that facility in place. 18 Tuesday and Wednesday. 18 O. Anyone else? 19 A. Not that I -- not that I remember. 19 And then Thursday afternoon I got 20 20 I'm not saying there wasn't. I just don't called in around 4:00 to come over again to 21 21 Lehman by Rich to start taking a look at the remember. 22 22 Q. Were you part of the group of inventories that were coming in related to, 23 23 you know, an effective settlement of the asset people from Barclays that was negotiating the 24 24 terms of the transaction with the folks from purchase to make sure we were getting, you 25 know, what we bought and everything we bought. Lehman?

But you believe there's a document 4 Q. The question I'm asking --4 or documents from Monday which would contain 5 MR. STERN: I'm objecting to the 5 that information. 6 proposal term. 6 A. There was a Monday -- there was a 7 MR. TAMBE: That's fine. 7 document that contained that information on 8 8 the Monday, okay? That deal didn't happen so Q. You proposed some haircuts or 9 valuation adjustments, right? 9 I have no idea if that still exists or doesn't 10 0 A. Yeah. By category we said we L1 11 think we need --Q. All right. We got down this 2 Q. When I use the word proposal 12 discussion talking about how the deal changed 13 that's what I'm talking about, okay? 13 or how features of the deal changed during 14 4 that week. That deal that was being discussed A. Okay. 15 Q. That proposal. Was it by asset 15 on Monday, did that deal get done? 16 16 category or by specific asset? A. So the deal on Monday, okay, in 17 17 A. If we had a valuation adjustment the context of the bigger deal, I guess yes, 18 it was by asset. And if we had a haircut it 18 it got down. But in the context of what I was 19 19 looking at, which was the purchase of the was by category. 20 20 Q. Do you recall any of the category inventory, that aspect of the deal didn't get 21 21 done, okay? type haircuts that you proposed? 22 22 When I showed up on Thursday night A. The actual amount? 23 Q. Yeah. 23 there was a -- I got there around 4:00. 24 A. No, I don't. Off the top of my 24 Somewhere around there. And I expected to 25 take a look at, you know, the settlement list 25 head I don't know. I'd have to look at the Page 32 Page 33 1 M. KEEGAN - HIGHLY CONFIDENTIAL 1 M. KEEGAN - HIGHLY CONFIDENTIAL 2 2 of what inventory we got and then just do a Lehman on valuation and we were leaving 3 simple comparison back to what we bought 3 behind. Monday and say, Yeah, it's the same list. It So it was at that point I learned 4 4 5 wasn't the same list. And, in fact, there was 5 for the first time that the agreement had 6 a huge delay in us getting anything back, you 6 changed and apparently sometime on Tuesday the 7 7 know. We had wired out through JPMorgan money Federal Reserve came in to us and said -- you 8 8 and they were supposed to deliver us know, it's been relayed to me by third 9 9 securities and were having difficulties parties, I have no idea what they actually 10 delivering us securities for some reason. So 10 said -- but, in effect, what I've been told, there was a long delay. Several hours. 11 11 if you guys want the deal to go through you 12 12 And my recollection is around 8:00 need to take us out of our repo. And so the 13 13 at night, you know, we started getting stuff construct of the deal changed from a purchase in and looking at it. We might have started 14 of inventory to taking an assignment of repo. 15 getting it a little bit earlier, around 7, but 15 Q. And who described that change in 16 the nature of the deal to you? we started looking at it. 16 17 17 But about 8:00 at night on A. Could have been Ian Lowitt from 18 18 Thursday night we noticed that this wasn't the the Lehman side. It could have been Rich. It 19 inventory that we had agreed to purchase on 19 could have been Jonathan Hughes. It could 20 Monday. It was different. And it included a 20 have been -- I don't know. I mean, I was kind 21 lot of the inventory that we thought was 21 of stunned when I heard it. But I don't 22 overvalued. At least the initial deliveries 22 remember exactly who told me that. I do know what I did after that is 23 were a lot of what we thought was overvalued 23 24 24 I had a conversation with Ian Lowitt, and in the mortgages area, mortgage agencies, that we said we couldn't come to an agreement with 25 said, "Ian, we're getting stuff we didn't

Page 34 Page 35 M. KEEGAN - HIGHLY CONFIDENTIAL 1 M. KEEGAN - HIGHLY CONFIDENTIAL 1 2 2 want. You need to take it back and give us inventory. And so we knew they were marked 3 3 wrong. Or we believed they were marked wrong. the stuff we bought." 4 And he explained that he couldn't 4 And, therefore, we were, you know, 5 do that because even though they hadn't filed 5 short cushion or haircut, if you will, on the 6 6 bankruptcy, the counterparties to the repo for repo. And, you know, that was a concern to us 7 7 the securities company were grabbing because we had -- on Monday in effect 8 negotiated, you know, what we thought was a 8 collateral and liquidating it on them. And cushion to protect us, and -- similar to a 9 9 they didn't have the inventory we bought 10 anymore. They only had what was in repo at 10 haircut on repo. And on Thursday night we 11 11 the Fed. were finding out that the actual repo haircuts L2 12 were in effect getting absorbed by the mismark Q. Did you have any discussions with 13 13 Ian Lowitt or others about finding additional of Lehman securities. 4 inventory beyond the inventory that had been 14 So, yeah, we needed additional 15 identified on Monday? 15 collateral to protect us. Q. And did you have in mind a number 16 16 A. Yeah. Because we had value -- we 17 or target amount of that additional were getting, for instance, these mortgage 18 securities, agency mortgage securities. I 18 collateral? 19 think the number, and I don't recall, Stephen 19 A. I did not. I just -- I didn't --20 20 would know the exact number, but I think we I didn't -- you know, we didn't -- we knew, 21 21 for instance, the billion eight, but we didn't thought the adjustment should be as much as a 22 22 billion eight of new securities. And Lehman know what else we got. And we were struggling 23 all night long to find out what we were did not agree with us. So those securities 24 were to be left behind. And then all of a 24 actually getting in terms of inventory, 25 sudden they show up in our box. Our because it came in dribs and drabs through the Page 37 Page 36 1 M. No. I did not discuss a specific 13 13 number. of what the haircut cushion was. And the 4 Q. Did you discuss a range? 14 question we were being asked was I guess the .5 A. No. What we were asked was -- the 15 way the deal was structured initially there 16 16 was some liabilities we're assuming as well, question we were asked was how much your 17 17 haircut -- so -- we gave a number -- you know, is there enough cushion to pay for those 18 18 an amount of money to the Fed, in essence, liabilities. And we couldn't answer that 19 19 which was I think gross somewhere in the \$45 question. 20 20 million area. Okay? The Fed delivered the O. Was it a feature of the 21 21 securities that went through JPMorgan. I have transaction as you understood it that the 22 no idea if what we got was what came out of 22 cushion you had negotiated on Monday would be 23 23 sufficient to pay for the liabilities you were the Fed and went to JPMorgan or how JPMorgan 24 24 determined what we got. All right? But we assuming? 25 got stuff from JPMorgan. A. No. Not on Monday night, no. I

Page 38 Page 39 M. KEEGAN - HIGHLY CONFIDENTIAL 1 M. KEEGAN - HIGHLY CONFIDENTIAL 1 2 had nothing to do -- I had no idea that there 2 MR. Did you ever make it down to the 21 lines. 22 courthouse for any of hearings about this 22 I guess during the -- while they 23 23 were in the courtroom I got asked the question matter? 24 A. No. 24 pretty late at night from Mark -- I think he 25 sent an e-mail out that he was trying to get a 25 Q. Did you ever talk to anyone who Page 44 Page 45 M. KEEGAN - HIGHLY CONFIDENTIAL 1 M. KEEGAN - HIGHLY CONFIDENTIAL 1 question answered. I answered that question. 2 5 billion of repo of the inventory that we 2 3 Q. Do you recall what the question 3 agreed to buy on Monday night. For some reason unknown to me 4 was? 4 again that proved to be about 15 billion by 5 A. The question as I read it were did 5 6 we take any assets from JPMorgan out of the 6 Thursday. And it contained securities that we 7 tri-party repo. And, you know, I don't know 7 did not purchase or agree to purchase on 8 if you know what the tri-party repo was or not 8 Monday night. 9 but --9 So the first thing I was asked 10 10 when I got to Lehman on Monday -- on Thursday Q. When you refer to the tri-party 11 11 repo what are you referring to? night, sorry, not Monday -- Thursday night, 12 A. So, again, on the Monday night one was for -- Jerry del Missier called me up and 12 of the things that was going on in addition to 13 13 said take a look at the repo with JPMorgan and 14 the asset purchase is JPMorgan came back to us 14 tell me whether we should roll this or not. and said, Listen, you guys are buying these 15 And I got the list of collateral 15 16 guys. If you're buying some of the inventory 16 that was in repo and there was a \$5 billion 17 17 can you help us out, all right, and take some security. I have no idea what it was but I of the repo of the securities you're buying 18 18 know we didn't purchase any \$5 billion and provide -- take some of the load off of 19 notional amount of security. So I advised 19 20 them because everybody was strapped for cash 20 Jerry this is not what we agreed on Monday 21 after this -- strapped for cash after the 21 night. It was not what we purchased. And, 22 22 you know, my recommendation would be not to bankruptcy. 23 23 roll a repo with JPMorgan. And so they wanted to know if we 24 could provide any repo for what we were So Archie sent an e-mail out. I 24 25 25 buying. And so we agreed to buy -- to provide guess he was trying to get a question

Page 70 Page 71 M. KEEGAN - HIGHLY CONFIDENTIAL M. KEEGAN - HIGHLY CONFIDENTIAL 1 1 2 2 Subtracting five hours from GMT, right? A. I did suggest that actually. So 3 3 on Monday -- it wasn't over the weekend that A. No, no. Three in the morning. So, yeah. we did that, right? So over the weekend, no, 4 4 5 5 Sorry. Yeah. I don't know why his e-mail is the answer to your question. But on Monday, 6 6 in GMT. I have no idea. But, yeah, he's -right, when I was going through the assets 7 yeah, that would have added five hours. So 7 that were in Lehman's broker/dealer and what 8 8 it's 10:00 -- you're right. It's 10:00 on other entities we might be buying or assets we 9 9 Sunday night. 10:30 on Sunday night. might be buying, one of the people I talked to 10 Q. In his e-mail he makes reference 10 was Eric Felder. I was specifically talking 11 11 to I guess Lehman people walking out of the to him about -- one of the things was that I 12 Lehman building. It's being carried on the TV 12 recall talking to him about was auction rate 13 13 securities and there was a bunch of Lehman coverage. 14 14 commercial paper and notes that were in his Do you see that? 15 A. Yeah. 15 inventory as well which I talked to him about 16 16 Q. At this point, late Sunday night, which obviously weren't -- you know, weren't 17 17 marked correctly at that point in time after early Monday morning, the transaction that you 18 were contemplating and working on on the 13th 18 the bankruptcy. 19 19 and 14th, that transaction was not going to go There were some credit link notes 20 20 forward, correct? that Lehman was the payor on that they 21 21 A. That's correct. obviously wouldn't be able to pay going 22 22 Q. Was there ever a contemplation forward. So those were the kind of topics I 23 23 that you would hire the former Lehman was talking to him about. And, you know, how employees without buying any of the assets of 24 24 should we look at the value of these things. 25 25 right? Because it's like Lehman is bankrupt Lehman? Page 72 Page 73 1 M. Monday I came 4 4 5 5 in -- what I was really focused on Monday was marked at. 6 And in the context of that 6 what's our exposure to Lehman. You know, what 7 7 discussion we got onto the auction rate swaps are going away. You know, that's what I 8 8 securities and the auction rate securities I was focused open. I wasn't focused on what 9 9 suggested that we didn't want to take them was happening in the market. 0 because of all the noise around auction rate 10 So he said, "Do you realize what's 11 securities and the whole remarketing and how 11 happening in the market?" 12 12 we would do that if we were to take them, et And I said, "No, I've been locked 13 13 up in your office all day. M. KEEGAN - HIGHLY CONFIDENTIAL which it was purportedly up to a billion dollars of good faith deposits in which turned out not to be real. It may have been real at one point in time but C Corp was the settlement agent for Lehman for FX. And I know Gerard LaRocco called Citicorp to find out what they thought about the value of that account. They kind of laughed at him. They said, Of course that's gone. They closed out all their accounts and used up -- closing out their contracts.

2.1

There was some exchange traded futures that I had nothing to do with and don't understand.

There was a couple other dead-ends which I don't remember what they are off the top of my head.

Q. Was one of the items 15(c)(3) cash?

- A. Might have been. I don't remember.
- Q. Is that a term you're familiar with?
 - A. Restricted cash? Yeah, sure.

Page 91
M. KEEGAN - HIGHLY CONFIDENTIAL

- Customer cash?
 - Q. Right. Customer cash.
 - A. Yeah.
- Q. And are you familiar with the notion of customer cash being one of the items that was proposed to plug the gap here?
- A. Not really. I mean, I don't know how you would plug it with customer cash unless they had deposits -- that Lehman had deposits within the 15 -- their own 15(c)(3) deposits, right? Which that might be their money.
- Q. The exchange traded futures that you referenced, was that -- were those OCC transactions?
- A. I believe they were exchange traded futures.
 - Q. On what exchange?
- A. I wasn't involved. I just know there was a list of five or six items that they proposed. You know, can you get us some additional value to cover the cost for some liability that we were taking on so...
 - Q. And you told us the FX clearing

Page 92

M. KEEGAN - HIGHLY CONFIDENTIAL account, that was an item that in your opinion went nowhere. There was no value there; is that right?

- A. I was actually in Gerard's office when Gerard was on the phone with Citicorp, the clearing agent at Citicorp, and the clearing agent at Citicorp assured him that through the process of liquidating the open FX contracts that Lehman Brothers' various entities had open with Citicorp, that that deposit was fully consumed in that process and that there was no value.
- Q. Do you know whether there was any value on the exchange traded futures?
 - A. I don't know if there was.
- Q. And you don't know one way or the other whether there was any additional value or accessible value in the 15(c)(3) accounts?
 - A. Nope.
- Q. At that time have you heard of any excess margin, excess OCC margin that was transferred from Lehman to Barclays?
- A. No. I mean, I just wasn't involved with that aspect of it, right? I

Page 93

M. KEEGAN - HIGHLY CONFIDENTIAL don't know anything about futures and exchange traded contracts and clearing and settlement. It wasn't what I was asked to do.

Q. Over the week -- the following weekend, the weekend of the 20th-21st, did you remain involved in aspects of the transaction?

A. Well, I went home Friday so I basically worked Thursday night till 4 in the morning. Went to the Four Seasons and slept from 4 to 6. Came back at 6. And then Rich been to bed at -- you know, 6 to -- he was back by 9 I think. And then I worked that morning until probably again 2:30, 3:00. Went home. Checked in on Saturday morning to try to find out what happened at the court hearing. Asked if I was needed and was told I wasn't needed. So I stayed home. And then I ended up having to get on the phone and spent really pretty much most of the weekend on the phone talking to various Lehman employees that we had hoped were coming to join us but were talking to other firms about not coming and so I talked them out of doing that and coming with us instead. So that's that I spent the

Page 94 Page 95 M. KEEGAN - HIGHLY CONFIDENTIAL 1 M. KEEGAN - HIGHLY CONFIDENTIAL 1 2 2 weekend doing mostly. A. I don't know what the terms of the 3 3 Q. With respect to movement of settlement were if you're asking me that. collateral or valuation of collateral did you 4 4 Q. I'm asking you if you were aware 5 5 have any involvement in that? of the fact of the settlement. A. Yeah. I believe there was a 6 A. I didn't do anything in that. 6 7 Q. How about the following week, the 7 settlement. I know that after -- so Lehman --8 week of the 22nd, were you involved in any 8 so JPMorgan and -- I believe because they had 9 movement of collateral or valuation of 9 operational problems were unable to deliver 10 10 securities to us timely on that night. Were collateral that week? 11 11 A. No. Not really. That was -unable to deliver everything that was in 12 the -- the we thought was in the repo to us. 12 once -- once the -- you know, we closed on the 13 trade, got possession of what we got 13 So they delivered -- and they delivered us 14 possession of, that was -- Stephen was the 14 securities late. Our clearing agent stayed 15 point person for that. He was the point 15 open as late as they could which was well past 16 16 person for coordinating with all the other what they normally would do. You know, say, 2 17 desks and putting the proper value on it and, 17 in the morning. And we hadn't received -- we 18 you know, distributing it out to the desks and 18 put 45 billion of value out, but by JPMorgan's 19 19 hedging it, et cetera. That was his job. He measurements they hadn't given us 45 billion 20 kept me informed of what he was doing in the 20 yet. And so they posted another 7 billion in 21 cash is what I know. We got 7 billion in 21 big picture, but I wasn't involved day to day. 22 Q. Do you have any knowledge of a 2 cash. settlement that was entered into between 23 23 And that -- we did have cash. And JPMorgan, Barclays, LBI, Lehman Brothers, 24 then we went to move the cash later apparently 24 25 25 Inc., the broker/dealer, in December of 2008? and JPMorgan said you don't have cash. And Page 96 Page 97 1 M. KEEGAN - HIGHLY CONFIDENTIAL 1 M. KEEGAN - HIGHLY CONFIDENTIAL 2 2 obviously there was a dispute about that. to J. LaRocco and others. 3 Q. And your understanding is that the 3 Do you see that? 4 settlement was to settle up that dispute. 4 A. Um-hum. 5 5 Q. Yes? A. Yeah. 6 A. Yes. 6 MR. STERN: You marked 302A. Are 7 7 we going to use that? Q. And there's a totalling up of 8 8 MR. TAMBE: We used it a little values and cash amounts. 9 9 bit. We'll go back and use it some Do you see that? 10 10 A. Yeah. more. Q. There's a line item in that e-mail 11 MR. STERN: Okay. I just want to 11 12 12 note for the record that 302A may be a that says Excess Collateral, 7.19. 13 privileged document at least in part. 13 Do you see that? A. 7.19. Yeah. I see that. Okay. 14 I'm not sure. I would have to talk to 14 some people about that. But I just want 15 15 I see it. Q. You don't know what that means? 16 to reserve my position on that. 16 17 BY MR. Just one first point of So, you know, at the end of the day what I was clarification. That 45 million, do you think trying to get a handle on was how much value 15 that's accurate or is that supposed to be 45 did we actually receive to do the repo. The Fed repo. And we couldn't get it from Lehman. 16 billion? MR. STERN: Objection to the form. And we couldn't get it from JPMorgan. We A. Total BoNY market value 45 tried to get it from BoNY but BoNY just kept billion. I would -- I'm speculating but I giving us different numbers. So I think think it's probably billion he's probably 20 that's what he's referring to. 21 referring to. I said there were several Q. And then if you look at the first different versions of BoNY collateral value 22 page of the e-mail string, the second e-mail list put in front of us. There was a 47 list, 23 down from Robert Azerad dated Monday, there was a 45 list, there was a 52 list. 24 September 22nd and, again, it looks like you 25 Q. And when you're referring to -are not on this but it was forwarded to you.

Page 130 Page 131 M. KEEGAN - HIGHLY CONFIDENTIAL 1 M. KEEGAN - HIGHLY CONFIDENTIAL 1 2 2 A. Off the top of my head I don't A. Yeah. I referred to it several 3 remember specifically. I do know -- I think I times as the unpledged asset schedule. Yeah. 3 4 know what she's talking about. But I don't 4 Q. And what was your involvement in 5 5 know what the security actually is. But it's that? 6 6 another one of the -- it's another one of the A. Friday morning, the 19th, I was 7 7 Lehman structured finance trades where they called into Rich's office --8 8 Q. And that's Rich Ricci? basically were taking their loan books, 9 9 turning it into AAA securities so they could A. Rich Ricci. Who was working out 10 post it with the Fed and get the funding. 10 of the Lehman office. 11 And I was presented this schedule. 11 Q. And so is that what you understand 12 I think it was Paolo Tonucci may have provided 12 the \$1.1 with JPM to refer to at the beginning 13 13 it to Rich and Paolo may have been in the room of the e-mail? 14 14 A. That JPM is holding 1.1 billion of at the time. It was Paolo or anybody else. 15 SAS and we got 80 million of it delivered to 15 It was definitely a Lehman employee. And they 16 16 said that this was the schedule of 17 17 unencumbered assets that they could provide Q. Okay. I don't have anything 18 further on that document. 18 us, they could get -- you know, incorporate in Mr. Keegan, were you involved in 19 19 the deal and give to us if we wanted it for 20 the values that were indicated. 20 any way in the creation of any schedules --21 So I was asked by Rich to take a 21 actually, strike that. 22 22 Were you involved in any quick look at the values and try to 23 23 substantiate the values and determine whether discussions with Lehman Brothers employees 24 regarding any schedules of unencumbered 24 we thought this was something we thought had 25 25 clearing box assets at DTC? value or not and whether we would be willing Page 132 Page 133 1 M. And then 4 Q. And what did you conclude? 4 Navigator. And on the muni securities we were 5 A. That it did have value and we 5 able to go to Bloomberg and actually get a 6 6 price but that for all -- you know, for all should take it. 7 7 intents and purposes that was Lehman's price. Q. And just to be clear, unencumbered 8 8 box -- I'm sorry. The unencumbered assets you So I have no idea if that was a good price or 9 9 were referring to were at DTC? not. 10 0 A. I don't remember if they D -- I But we weren't able to do much 11 don't remember if they were DTC or whose 11 more than that with that list. And we had L2 assets they were. I couldn't tell you they 12 Navigator and, you know, the bottom line I 13 were all DTC because I believe some of them 13 guess is you weren't getting anything else. were at JPMorgan, in fact. 14 There wasn't anything else to give us. So we L5 I mean, I've been led to believe 15 could take it or not take it. 16 that the Navigator stock which to my knowledge 16 Q. Do you recall any other assets 17 besides the munies and the Navigator? 17 to this day we still haven't gotten is sitting 18 in safekeeping at JPMorgan. I have no idea if 18 A. - Q. No. I'm just interested in the principal folks that report to you directly.
- A. The team is -- well, the team is slightly different today than it was a few months ago. It is about 30 or so people. They are -the senior folks are -- a number of them are senior traders who trade a range of securities. I can give you their names if you like, if it is relevant, for those traders, and then there are also operations and risk management personnel as
- Q. Could you give me the heads of the -let me just ask it this way: Is your group broken into separate divisions or --
- A. Separate not divisions but functions. It is one trading operation, but within that, we have different products, different risks. Therefore, the group is organized along those risks. But it is really -- in the terminology of a bank, it is one desk.
- Q. OK. Does Mr. Yang report directly to you?

KING - HIGHLY-CONFIDENTIAL

Page 11

A. Yes, yes. Jasen reports directly to

me.

Q. Is it fair to say that you held this same position during the week of September 15, 2008?

A. Yes.

Q. And --

MR. STERN: I am just going to put out the blank September 2008 calendar, just in case Mr. King needs to reference it.

MR. HINE: That's a good idea.

A. It is fair to say that this group came into existence or was derived from another group which I ran in 2007 in a response to the crisis in credit markets and mortgage-related assets. So therefore, the group's character has changed in response to those conditions over the two years, or three years. I guess it is going on towards three years now.

One of those things that prompted change was the bankruptcy or seize of Lehman itself. So we expanded the group in response to the need to manage the substantial portfolio of risks and assets which the bank had taken on as a

Page 12

KING - HIGHLY-CONFIDENTIAL

result of that acquisition. So there is a slight change in character immediately prior to and immediately following the purchase.

- Q. When you say that acquisition, you are meaning the acquisition of Lehman assets?
 - A. The Lehman assets, yes.
- Q. As you can probably expect, most of this deposition is going to center around the week of September 15.
 - A. Right.
- Q. Could you give me just a general description of your role in connection with the Lehman acquisition during that week?
- A. Yes. My -- we are a -- I forgot P is principal and not portfolio. We are a principal risk taking or risk managing unit, so -- and essentially we were -- we manage or managed illiquid risks, particularly difficult to trade risks, particularly things like mortgages, mortgage-backed securities.

So during this week and in the lead up to the week, our job was -- my job was to facilitate in gathering estimates as best as possible in a very short period of time for the -- Page 13

- for useful marks or valuations or prices for various securities that were part of the various different proposed purchase -- asset purchases,
- 5 and then the on boarding of this risk and then the 6
 - risk management of that risk. That was our function.
 - Q. When you say illiquid risks or illiquid assets, is there a separate unit within Barclays that performs your function with respect to more liquid assets?
 - A. No. A -- I mean I guess the answer probably is yes, at some point. It may be it would be Treasury or it would be something else in the bank. For the most part, banks don't hold large amounts of liquid risks, that trading functions -- the reason this group was formed was to deal with the fact that these are incredibly difficult assets to dispose of.
 - O. I understand.
 - A. And they trade, many of them trade by appointment, meaning there is no exchange or obvious market that you can easily trade the assets.

So we all, we do use liquid

Pg 204 of 459 Page 14 Page 15 1 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL 2 2 instruments and liquid assets in the risk books appropriately, that we are reporting 3 management of these illiquid assets, so we trade 3 appropriately, and that all of the things that we 4 4 everything. PCG is a control function. So 10 10 am, September 15 is the date that Lehman Brothers 11 that's -- we are a trading group as opposed to 11 Holdings declared bankruptcy. 12 12 a -- so we work, I work for Eric Bommensath, who Can I ask you this question first. 13 13 You are aware there was some discussions between works for Jerry in the business, if you like, as 14 opposed to product control, which is a control 14 Barclays and Lehman prior to that filing of 15 function which reports up ultimately into Patrick. 15 bankruptcy? 16 16 O. No. Then we were really strictly 9 9 mortgage or asset-backed type assets. There was Lehman Brothers in its entirety. 10 10 O. OK. an overall coordination of many groups. At that 11 11 point there were many groups or many trading desks A. And then -- and there, our function 12 was to look at just the mortgage-related assets of 12 at Barclays in Europe and the U.S. that were 13 13 the Lehman Brothers overall group. But the attempting to assess the entire Lehman Brothers 14 function was then the same, so assess estimates of 14 balance sheet or list of securities and assets. 15 15 value or prices for categories of assets, and we So we were then just one, we were focused on one 16 16 never really got to the risk management stage, part of that. 17 17 obviously because no transaction occurred. weekend. That was really -- I thought that was --

I thought in the lead up to that week, there was a

data room that was set up by Lehman. I never went

Page 18 Page 19 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL 1 2 2 to it actually, but one of the people that works A. Right, right. 3 3 for me did. Q. But you didn't have the luxury of 4 4 I would have been at Lehman over the time. Is that what I hear you saying? 5 5 A. Luxury of time and even time -- then weekend, but most of what we did was phone calls 6 to people and -- I mean in reality, there is a --6 markets are actually moving, so I would have to 7 7 it is a -- there were many, many -- this was a be -- if you had infinite resources for a very 8 8 phenomenally complex situation just because of the short period of time, then you might try to go 9 number of line items. So in many respects, the 9 bottom up. 10 approach that we took to the analysis was high 10 As -- once we had a definitive set --11 level down rather than bottom up, meaning to have 11 it was really -- so the first exercise was -- and 12 12 accurately assessed the value of an individual this was repeated as we went through the 15th, 13 13 security by reference to talking to a trader when through the various iterations of the asset 14 there were then, say, 10,000 line items was less 14 population, was one, do we have a complete 15 useful than being able to initially categorize 15 description of the population, can we categorize 16 things as residential mortgage-backed securities, 16 the population, can we estimate valuations for the 17 17 credit card securities, et cetera, et cetera, categories within the population, can we refine 18 subordinate, senior, and then have broad 18 and improve those estimates, increasingly becoming 19 19 valuations based on where we know similar markets more granular. Have we engaged the appropriate 20 20 trade, and then each day we just refined. desks, trading desks within Barclays to -- or 21 21 Q. OK, I think I understood what you existing Lehman desks, to provide us as much input 22 22 said. When you said bottom up, you mean if you to where markets are or what securities -- what a had the luxury of time, you -- one might go CUSIP 23 23 particular security is. by CUSIP or security by security and try to assess 24 24 And then the last part was how do we 25 the value of an individual security? 25 risk -- what is the risk associated with these Page 20 Page 21 1 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL 2 2 categories of securities and how might we either did the population of assets change from the plan to dispose of the assets or in the short term 3 3 weekend to the 15th? 4 risk manage the assets. 4 A. It was now the assets of LBI or what 5 5 Q. When you say risk manage, you mean we thought were the assets of LBI as opposed to 6 6 the assets of, say, LB. Because there we were hedging? 7 7 looking at all assets regardless of whether they A. For example, hedging, yeah. 8 8 were held by LBH or LBIE or -- so, but by that Q. So the process you have described, is 9 it correct to say it started on the weekend of the 9 point we knew we were just looking at or what we 10 10 thought we were looking at was the assets that 13th or 14th and then continued in some form 11 throughout the week of the 15th? 11 were included in the balance sheet for LBI. 12 A. Yes. Q. OK. Now, were you provided additional 13 13 information on the 15th or did you just use the O. And how did it change -- well, as I 14 understand it, on the 14th, it was concluded that 14 information you had previously acquired or --15 A. No, we -- I'm not sure -- we may have 15 there was no deal between Barclays and Lehman, 16 16 been provided some of that information the correct? 17 17 previous week. Again, because the scope of the A. That's what I understand, yeah. 18 18 Q. And how did you learn that the talks exercise had narrowed from the entire -- you know, 19 were going to start again? 19 us participating in a small part of assessing the 20 A. I think it was at some point on the 20 overall assets of Lehman Brothers to a larger part 21 21 15th or 16th, we were once again asked to look at of a much -- a subset of that overall population, 22 22 another population of assets that was a subset of which was now just the LBI assets. KING - HIGHLY-CONFIDENTIAL

- Q. In the course of your -- well, let me get back to the 15th. On the 15th and 16th, did you participate in meetings between Barclays and Lehman?
- A. I don't think so. I mean we may have done on the 16th, but if it was, it was strictly to do with identifying the -- you know, a trader who may have been able to provide us clarity about what a particular security was. But I think -but there wasn't an awful lot of that that we had to do.

And it was very -- you know, we did more of that in the previous week when we were trying to understand what the asset population was. That was really when we needed some assistance with people from Lehman.

But on the 16th, around the 15th and 16th, the only thing I could think, we probably -there must have been some dialog, have we got a list of securities to look at. So I would think that we were sent lists, so if you wanted to include e-mails sending us lists of securities, I'm sure that yes, there is communication.

But communication in the sense of did

Page 24

KING - HIGHLY-CONFIDENTIAL we sit down and have conversations with people, very, very limited.

- Q. Well, I understand the providing of information part of the discussion, but separate from that, was there a back and forth as to the valuation or marking of particular Lehman assets that were the subject of the discussions?
- A. I don't think so really. The -- on the 15th and 16th. No. I think for the most part the 15th and 16th was trying to establish have we got -- these exercises are -- they take a lot of effort.
 - Q. Sure.

A. And the reason why we were involved was because we had some proficiency in dealing with understanding new populations of securities or assets, because that's what we had been doing for the last year and a half.

So one thing that we -- one thing that is critical is to insure that you are not spending a tremendous amount of time working on things that were irrelevant. So the first thing we need is to be sure that we have got the correct population. If we are spending time analyzing something that

Page 25

Page 23

KING - HIGHLY-CONFIDENTIAL

isn't going to be delivered, then we have definitely wasted time. We are coming up with a wrong valuation and we will never manage the correct risk.

So I think mostly around the 15th and 16th would have been, well, OK, what are we looking at this time? And of course during the course of that week, and that's why -- you know, my -- the only reason why I am vague as to exactly what happened the 15th, 16th and 17th, is that it changed so much so rapidly, that most of what was happening on the 15th and 16th and almost all of what we were looking at became redundant by some time on the 16th, 17th or 18th.

MR. STERN: Let me just to clarify, I take it you are focusing on what Mr. King's role was and what he was involved in, and when he uses the term "we," he is referring to himself and his group as opposed to Barclays as a whole.

THE WITNESS: That's absolutely correct.

MR. HINE: I understand. I understand.

But, Mr. King, you folks didn't accept 2 that's an inadvertent output of the fact that we 2 3 the -- at face value the valuations or marks that wanted to bid it at 50-something. Q. I think my question exhibited my Lehman had put on various asset groups, did you? 4 A. No. 5 inexperience in this field, so I will try again. 6 Q. Did you come to some conclusions about Did you -- when you received the 7 information from Lehman, it had some kind of book the accuracy of Lehman's marks when you were 8 looking at all these asset groups? value ascribed to it by Lehman, correct? 9 9 A. Yes. A. It is a peculiar way to describe it. Q. Did you understand that by the time 10 did we come up with some assessment of the accuracy of Lehman's marks. In some respects I 11 Barclays and Lehman signed an agreement, that could say I didn't care about Lehman's marks. I 12 there was going to be some kind of discount off of 13 that book value for the pool of assets that cared about what was a reasonable assessment for 14 Barclays was going to be acquiring? the value of the assets and ultimately what was 15 A. The signing of the agreement on the the risk that we were going to have to manage. 16 6 If you think about the way a -- as a Tuesday that you have told me about? trader would think, we received phone calls from Q. Yes, yes. somebody saying I'd like you to buy -- would you -- or later --9 19 be interested in buying the following at a price Yes. 20 I don't know much -- I don't really or 72. It is fascinating it is 72 they would like 21 to sell it to me at, but mostly I am interested in know what agreement was reached on the 16th. All where we would be interested in buying it, 55. 22 I know is that there was some assets that we were 23 So can I therefore say ex post facto looking at. I would assume that it wouldn't have been at all a surprise to anybody that a bid, even that, you know, well, I have got some -- I didn't 24 think their offer of 72 was particularly accurate, 25 a reasonable bid or reasonable assessment of a bid Page 28 Page 29 1 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL for small size would be at a discount to book that or 80 percent of that or some number. value if that's the valuation that you are 3 So it is definitely the case that when 3 4 referring to. Book value being where it is held we were trying to guess what might be a reasonable value, in a very, very distressed market -in books and records. 5 5 Q. Well, I guess I understand your Q. Sure. 6 6 answer, but do you have any recollection of A. A very, very distressed market for a very, very substantial number of assets that 8 discussions during that period of time -- and 8 again I'm talking the 15th and 16th -- about Barclays would want to be selling, and Barclays L 0 either discounting or reducing the values that didn't -- bear in mind, Barclays didn't want these .1 Lehman had ascribed to these pools of assets in assets. The assets were -- you wouldn't want to order to come to an agreement as to the pool of hold on to them. They consume capital. They need assets or the marks for the pool of assets that 13 to be funded. Funding was expensive, capital was Barclays was going to acquire? 14 expensive. MR. STERN: This is you personally. 15 The assets were part of, you know, a 16 A. This is me personally. I have never deal, and therefore, they would -- and, you know, the -- I avoided the word "hedging" when you used had any conversations with anybody at Lehman about 18 discounting Lehman's marks. It is definitely the hedging because hedging doesn't really -- hedging case that in the crudest -- if somebody said to 19 still means there is a left-over risk. You never me, Stephen, here is a security, you don't know 20 really -- especially with assets like this. what it is, but, you know, it is -- it has a Hedging is just, well, I have got one thing that price -- the last time it traded it had a price of I'm short against something I am long. It is not 50, let's say, mentally, I would say, well, I know very well hedged, there is still a risk, and it is not -- I certainly wouldn't be bidding 50. 24 that's why banks and hedge funds have had quite a I would be bidding half of that or 20 percent of lot of difficulty in the last few months.

4

Page 30

KING - HIGHLY-CONFIDENTIAL

So we knew that the objective would be

that we need to dispose of this risk. That was the objective. So if I was looking at a portfolio of assets, and you held the assets at 100, let's say, I'd say I don't know -- and I felt comfortable that I understand what the assets are, my bet is I couldn't sell those for more than 80 cents of where you have currently ascribed a value to them.

So yes, when we -- as a desk, the "we" meaning my group, one of the first things that we did was say, let's just assume that the stuff we don't know is at 50 percent of book value. The stuff that is exchange traded equities is at 95 percent of where it is, because that was a -- the crudest form of guess.

- Q. Is that the type of analysis you were doing on the 15th and 16th when you described -- I think you previously talked about a top-down approach as opposed to bottom up?
- A. Yes. Because you do that -- really if you think about it, you repeatedly do that same process at an ever-more granular level. Even if you got down to an individual security, a trader

Page 31

KING - HIGHLY-CONFIDENTIAL would say I've projected -- the thing about some of these securities and assets is, unlike -- not all of them but some of them, and certainly the ones that we would have been looking at at this time, they are not -- even though many of them are called fixed income or debt instruments, the amount of cash that they would be expected to ultimately pay is actually uncertain, either because there is a lot of risk associated with the borrower or there is a prepayment risk or there is something that makes the cash flow uncertain.

So the way a trader would look at it is to say, I'll make a -- I'll form a view of how much cash that I would want -- that I expect to receive on this security, and then I would want to discount the amount of cash back to some price that I felt that I was earning an appropriate yield on. And then when a trader was then subsequently bidding, they then may provide -- say, actually I'll bid 80 percent of that.

So whether it is at the portfolio level, when we are looking at a whole balance sheet, or an individual CUSIP, in many respects the process is the same. It is about how

Page 32

KING - HIGHLY-CONFIDENTIAL

confident you can be that you have assessed everything correctly, because there is so much uncertainty.

Q. I think I understand that.

So during this early stage now, the 15th and 16th, is it correct to say you're looking at particular asset classes or groups of assets by type and performing this type of analysis on them?

- A. Yes, yes.
- Q. And so certain groups of assets, you would be willing to pay a higher percent than other groups, right, or --
- A. Yeah. Because to reflect the idea that the uncertainty about the price or the cash flows was more or less clear.
- Q. (So were there particular assets or groups of assets within the Lehman portfolio that was supposed to be sold to Barclays that warranted much deeper discounts than others?
 - A. Yes.
- Q. And which were the most discounted -- or which groups would require the most discount from your perspective?
 - A. The assets that are the typical assets

Page 33

KING - HIGHLY-CONFIDENTIAL

that my group manages, which is things like mortgage-backed securities, deeply distressed credit securities, things for which there is a very, very limited market and poor visibility on the expected cash flows.

- Q. And what kind of discounts would those groups of assets get during this week?
 - A. To what?
- Q. I don't know, did you -- again, talking about the 15th and 16th, did you say -- again, I might be showing my ignorance here -- here is a pool of mortgage-backed security, a lot of uncertainty here, let's mark their -- let's discount their marks down by, say, 50 percent?
 - A. Right.
 - Q. You did.
 - A. Yes.
- Q. OK. And then other, presumably other categories more secure, more visible -- again, I might be displaying my ignorance, but perhaps government securities might warrant a much smaller discount in the mark?
 - A. Precisely.
 - Q. Is that right?

first thing I would have asked if somebody sent me this is, to my point about population, am I looking at everything, because otherwise this is redundant.

Whereas on the Monday, if someone said we are now looking at LBI, I can say is it correct that this is the population of what we are supposed to look at, and someone could say yes, and that would make sense. Now we have got something to work on.

So I would think I saw this on the -- and also, by the way, these things, even though they say 9/12, typically it would take 24 to 48 hours at least for somebody to produce this.

Q. OK.

L 9

2.1

A. So I very much doubt this -- although it is of the 12th, the 12th is close of business on the Friday, which means it almost certainly didn't exist until something like the Sunday, and I would think it was shown to us on the Monday or Tuesday.

Q. OK, fair enough.

Do you recall what you were -- I see a lot of handwriting and a lot of numbers. Do these

88 Page 39

KING - HIGHLY-CONFIDENTIAL refresh your recollection about what you were analyzing?

A. No. These are sort of typical scribble from me. The e-mail is -- the e-mail covering is quite elucidating because it highlights -- the fact that it is a physical -- one of the problems we had at that time was this is a physical. There also was -- I remember that there was -- and I don't have this, but there was a paper copy again of securities that -- these numbers are produced by Lehman's systems. So there would have been line items of all the individual securities that fed up into these numbers.

What Jasen is highlighting on the front is that we have obviously by the 17th, this definitely would have been the case as well, started to receive files, which would have been Excel files, I would think, and what he is starting to explain is, all right, we have started to try to understand what is the population that leads to this. If this is what we are buying, is the assets that are currently on -- the assets that are currently on LBI's balance sheet, his

Page 40

KING - HIGHLY-CONFIDENTIAL e-mail explains that we have started to get files that should be all of this, but they don't tie

out.

He actually points out, you know, corporate obligations, corporate stocks do not tie out to the summary. So we have been sent files that purport to be the same but that don't tie out.

Q. So tie out in your understanding means he is trying to compare the files of individual securities with the line item in the -- on this balance sheet and see that they add up to that total?

A. Exactly right. So he would have had something that says total corporate obligations and spot total, let's say. If he would have been sent a file that also purports to be corporate obligations and let's say included then the line items, a notional or a price, so he could calculate a mark, add the marks up, he ought to get back to that number, and his e-mail indicates that they don't.

Q. His e-mail is trying to, as you said, get the proper population of the securities in

Page 41

KING - HIGHLY-CONFIDENTIAL

each group?

A. Yeah. And you see, as you say -- my sentence is that I have asked Jasen to send this to James, because I thought I'd seen something that looked similar to it that might help us to be able to find out. Because with this, there is almost -- again there is almost nothing you could do. You would say -- using the percentage approach, you would have to just take very heavy haircuts to these large numbers and say I don't really know what is behind this.

(Then on his e-mail he is saying, we have got some stuff but it doesn't tie out to those numbers, and furthermore, we don't have listings for derivatives category. We are able to tie out the asset listings we were given on Monday. We were given some asset listings on Monday, so he is showing on Monday there were some files.

And then the last sentence is pretty interesting because it highlights the fact that the problem wasn't a static problem. It was a dynamic problem. So he has a list of securities, but he says the government and agencies book is --

Page 42 Page 43 1 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL 2 2 although we understand from Clement Bernard that classes that fell within your purview in the 3 3 the government and agencies book is shrinking as principal mortgage trading group as groups of 4 4 trades are unwound. assets that you were asked to look at? 5 5 A. Right. 15 A. As we went into the Thursday -- sorry, 15 assets, we therefore needed to risk manage them. 16 16 Thursday night into the Friday, there was Because just because we had assessed that as of 17 17 another -- there is another very difficult piece the Thursday they were worth some amount, 18 that was in the middle of that, which is 18 hopefully more than 45 billion dollars, by the 19 19 Monday, they might have been worth 35 billion operationally how do you settle this transaction 20 20 and then how do you risk manage it once the trade dollars. 21 21 has come in. Q. Right. 22 22 Q. Can you specify "this transaction"? A. So we better do something about that. 23 A. The Fed transaction. 23 So the focus started to move from how do we 24 24 The peculiarity of this, and we didn't manage, how do we even see and book -- how do we 25 really understand this at the beginning, but it 25 book securities that are not just going to be Page 80 Page 81 1 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL 2 2 collateral for a repo but are effectively going to distressed -- it is frequently the case, and we 3 have obviously seen this because of what happened need to be shadow booked into risk systems so that 3 4 we can generate appropriate risk metrics so that 4 with Bear and Bear's hedge funds that had 5 5 we can risk manage them. Because we had to say how are we Well, this was the mother of all 12 12 going to manage this transaction? How are we distress. We are in the middle of a bank, a major 13 13 going to manage this risk once Barclays has bank defaulting that many people had thought 14 14 lent -- once Barclays has lent -- in Barclays' wouldn't have been left to default, but had 15 15 defaulted, and we were about to undertake a book, it is going to have -- the repo desk seems 16 16 to have lent 45 billion dollars to a counterparty 45 billion dollar lending in which we would be 17 17 that is going to default, and that is long this risk with very limited ways of risk 18 18 collateralized with a number of securities. managing it. 19 And if it followed its normal process, 19 Q. So what did you do to risk manage it? it would be marking those securities, asking 20 20 A. Well, so Thursday we had to assess how 21 21 desks, asking price services to -- it wouldn't are we going to record in our books securities, 22 actually be assuming that it was going to get long 22 when we haven't actually booked the securities, we 23 the collateral and have to liquidate it. 23 booked a repo facility. So we had to construct 24 24 But here we knew that was going to be shadow books that were going to represent the risk the case, and it is mostly the case in other 25 of the securities that were in the repo facility,

Page 82 Page 83 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL 1 2 2 and then we sought to insure that -- our plan was couldn't hedge prior because of course if for some 3 3 on the Thursday, each of the desks had a list of reason the transaction hadn't settled, we would be 4 4 the securities that they were expecting to short the market, so there was no way to hedge 5 receive, and we had informed them that of course 5 until we knew that we actually were long the risk. 6 repo is -- this was overnight repo. KING - HIGHLY-CONFIDENTIAL to be risk managing on the Thursday and what we were actually risk managing on the Friday, and I know that that is -- that there was 7 billion dollars of supposed value, and I think they were using -- I don't know what marks they were using, but 7 billion dollars that had been substituted for cash, which therefore cash doesn't -- nice thing about cash, you don't have to risk manage

it, or at least we didn't think so. Q. I would assume so.

MR. STERN: Turns out you did.

A. Turns out we did. Cash is supposed to be cash.

And then in addition to that -- so there was a -- there were less secure -- rather than -- and I'm using these numbers just to try to indicate population as opposed to the accuracy of the numbers.

So that we had anticipated that at JP marks, that there was a population that JP assessed as being worth 49.7 of securities, that actually that was 42.7. Therefore -- and there was 7 billion of cash.

In addition, though, within the

KING - HIGHLY-CONFIDENTIAL

securities, they were not the same population. So it wasn't even that it was just a subset of the original population, the Thursday population, it was a subset of the original population plus about 10 billion dollars of stuff that we had never seen before.

- Q. That's where I was leading with the question. In other words, the difference that you saw between what you expected and what you received is both in the size of the pool as well as the composition of part of the pool?
- A. Correct. There was approximately -again I am using these numbers, using -- by reference to the JP marks, not my assessment of value or what we were ultimately able to sell them for. There was something like 49 -- we thought that there was going to be something like 49, a population that JP would mark at 49.7. There actually was only about 32 billion dollars of that population was delivered.

Then there was 7 billion of cash or cash that -- you know, cash was cash, and then there was 10 billion dollars, and now -- for which we didn't have any equivalent JP valuations, but

Page 96

KING - HIGHLY-CONFIDENTIAL

that once they arrived at BoNY, which was our custodian, BoNY assessed as having marks in total of about 10 billion dollars, and that portfolio we had not seen before.

- Q. What did you do with respect to that portfolio and the BoNY ones?
- A. The exact same as we had done with all the preceding lists of securities. We tried to assess had we got the entire population.

Bear in mind, the reason we do that, there is no point in risk managing something if it isn't what you actually own. So it has to start with do I really own this. We spent a tremendous amount of time focusing on do I have this, is this a population, categorizing the population, because now all we have got is a list of CUSIPs, so you have to get from CUSIPs to a description of the asset by name, by asset type, then to break it out into asset types, and then to assess what we think its risk is and what its value ought to be.

- Q. And so that's a process you started with respect to this 10 billion dollars --
 - A. On that Friday morning.
 - Q. -- on that Friday. Did you come to a

Page 97

Page 95

KING - HIGHLY-CONFIDENTIAL

conclusion on that Friday or when?

A. I think one thing that's also worth pointing out, the idea of a conclusion suggests finality. We had -- and I don't think we -- the conclusion probably should be the date on which ultimately it was sold, and stuff took a year to

On that Friday, yes, we did start to think that we had a list of all the securities that were delivered. That took time. And we started to estimate our own -- you know, Barclays' trading desk values for them in -- you know, in the environment that we were in, and the risk.

- Q. And did you come to any interim assessments on that Friday?
 - Yes, ves.
 - What did you assess on that Friday?
- A. In relation to -- I don't really remember too much on that Friday about the valuations, because we were very focused on the risk.
- Q. OK. Would you have the same answer if I said over the weekend?
 - A. Yeah. I mean over -- no, over the

Page 98 Page 99 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL

weekend, then it started to change. The -- we were, you know, reassess -- we -- between there and the end of the year, end of the financial year, we were constantly reassessing what we thought was the value of the securities.

So you're right, over the weekend we started to revert back to what do we think the -- what number are we going to use as a -- when management is asking me, well, Stephen, what did we take delivery of, they would like an answer and they would like it now, not a better answer in three weeks' time. So we had to come up with something. But that was a crude response.

And in some respects it didn't really matter to what we were doing, "we" being my desk, because what really mattered is, do we have the population and what is the risk of it.

I know that obviously some of the valuation work we were doing would then be feeding back into the negotiations that other parties were having about a deal with Lehman, but it actually wasn't very germane to what we ourselves were doing.

Q. I think I understand that.

You have mentioned two different -this is Friday now. You mentioned two different
sets. One is 32 billion dollars worth of
securities which had JP marks on them, and the
other is this 10 billion dollars of securities

other is this 10 billion dollars of securities that you had never seen before which had BoNY marks on them.

A. BoNY marks on it.

Q. Is this assessment that you are doing over that weekend primarily focused on the 10 billion dollar pool?

A. No, everything.

Q. Are you coming to some interim conclusions during that weekend about the marks?

A. Yes.

Q. And what are you finding out that weekend?

A. I don't really -- the one thing that I remember is saying that I felt that the cumulative amount of securities and cash that we had received in an orderly disposal, in not just a fire sale, we couldn't just sell -- we couldn't say let's sell these over the weekend and then we are done by Monday.

Page 100

A. I know there were discussions, both with JP and Lehman. We weren't -- my desk weren't part of those discussions.

Q. All right. Do you have any understanding of what happened in those discussions?

A. In relation to what?

Q. Well, do you have any -- someone from Barclays said words to that effect to Lehman, right?

A. Or to JP. I don't know -- the deck securities had come from JP. So why -- so -- all we cared about, why have we not got the same population that the Fed thought it had the night before?

Q. You are comparing what you got on Thursday night and Friday to the population that you had spreadsheets about what was previously comprised of the Fed pool?

A. Yes.

Q. And there was a difference in about 10 billion dollars worth of those securities?

A. 17 or so billion, because there is some missing, 7, and then the 10, and using those

KING - HIGHLY-CONFIDENTIAL

The -- there was -- the loan was adequately collateralized. And that I remember.

Q. And you told that to your supervisors or whoever was asking?

A. Yes, yeah, yeah. And then on the Friday we started to hedge.

Q. You started to hedge both the 32 billion pool and the 10 billion?

A. We didn't differentiate. We really didn't start talking too much about what we had received. Much of the discussion about what we had received versus hadn't received really didn't go on until later on.

We only really cared about what would -- you know, the cumulative amount of what we had received.

Q. Later on meaning after the weekend?

A. Yeah, weeks later.

Q. So did you have any discussions over that weekend with Lehman or did anyone from Barclays have discussions with Lehman as to, in words or substance, hey, how come we got 10 billion dollars of securities we weren't expecting?

Page 101

Page 110 Page 111 1 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL 2 Q. Well, Lehman, LBI declared bankruptcy 2 that means? 3 3 A. Right. So I'm not sure where this -on that Friday, right? 4 4 this may have actually -- I think -- there were A. Maybe that was it. Was it on the 5 5 two -- you mentioned that there were -- there Friday? 6 was -- there is sort of multiple tracks that may 6 MR. STERN: The 19th? 7 have been going on simultaneously here. We 7 A. OK. I don't know. Maybe that was on 8 8 were -- my desk was focused on what assets do we the Thursday -- I don't know the timing of this 9 9 particularly, but the -- presumably there was -- I have, what do we think we can recover from them, 10 10 could see that they -- the traders had to mark in valuation, you know, in liquidation valuation, 11 and how do we risk manage them. 11 certain things. 12 12 There also was a formal process of how I think this, David's involvement here 13 13 do we and how do Barclays and Lehman mark the is because we would like to have a mark on what we 14 14 books and records, the securities. have just taken delivery of, because all we have 15 15 got is a list of securities, and what was clear, I don't even know whether this was 16 16 something that was Lehman asking Lehman people to it is not clear from this e-mail, is that some of 17 17 mark their securities or Barclays asking Lehman the securities at the BoNY marks were atrociously people to mark their securities or for what 18 18 mismarked. So you need a trader. 19 19 purpose it was. Most price testing functions work 20 20 extremely hard. Price testing functions meaning Bear in mind, traders were supposed to 21 21 still be sitting in their seats of a nonbankrupt groups. We have a price testing group within 22 22 entity on the Friday marking their books. They Barclays. There is a price testing group within 23 23 still had a -- they worked for a broker dealer. Lehman. BoNY and JP as custodians need to try to 24 24 They have long risk positions. They have an come up with prices for thousands and thousands 25 obligation to mark every day. 25 and thousands of securities every day. So they Page 112 Page 113 1 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL 2 2 have to do it in some kind of batch way. So they then we will advance less than that as the loan. 3 3 come up with heuristics by which they mark things, So for example, for mortgage-backed 4 because otherwise how could you do it? 4 securities that might only be 50 percent of the 5 5 But that's not the same as where a supposed mark. So they are not as worried, and in 6 6 trader on a minute, who sat in his seat, talks to normal market conditions that's supposed to be 7 other traders and says, I would be willing to 7 fine. They are not actually as worried that they 8 8 trade. It is supposed to be a pretty good guess, have got the mark perfect, because they are only 9 but it is never perfect. 9 lending 50 cents on the dollar, or on equities, 10 10 And in between the bankruptcy of LBH for example, I think they lend 90 cents on the 11 and bankruptcy of LBI, it was -- you know, it 11 dollar. For agencies maybe they lend 80 cents on 12 12 is -- the tracking error of that kind of approach the dollar. 13 13 is bound to be big. So as soon as we have taken So they are saying, I think I have got 14 delivery, it is great -- at least we have got 14 this, I know statistically I must have some error 15 15 BoNY's assessment of where they thought they would on it, but I am only lending 80. Whereas the 16 16 be willing to advance against -- bear in mind, the trader when he trades, he is trading there, and he 17 17 is exposed to the first dollar of mispricing, not other thing about the BoNY and JP marks is that 18 18 the Fed was using -- what the Fed does when it the dollar after the haircut. So they have very 19 takes those marks is -- I can't remember the 19 different tolerances for error. 20 advance rates. I learned them later on. 20 So this, on that Friday morning what I 21 21 But when the Fed lends, if you looked, asked David to do, let's see if we can get an 22 went to the Fed's website and looked at the 22 assessment as quickly as possible of the -- what 23 advance rates of the securities, what it does is, 23 the things we haven't seen before are worth, and 24 24 it says, we will assess a value of security at it may have been, I don't remember, also the some mark that the custodian has provided us, and 25 stuff, what we long today, worth today, not

Page 114 Page 115 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL 1 2 2 yesterday, because that also is different. more of an assessment of, you know, if you had 3 3 And what he is highlighting is that to -- if you were willing to buy it today, where there are -- in the first paragraph he highlights 4 4 would you buy it. 5 that of course the Lehman guys hadn't actually got 5 So they are being asked to provide an 6 6 in their inventory the list of securities that assessment of both. There just could be no bid. 21 explain what I do know about this e-mail and about 22 22 There was no bid for any of this on this date. things that happened on the Friday. So hopefully 23 And the second is a typo in there. It 23 I have answered that question. 24 says "at a bin in comp." That should be "a bid in 24 Q. Yeah. 25 comp mark." That was presumably supposed to be 25 A. This feels like a different question, Page 116 Page 117 KING - HIGHLY-CONFIDENTIAL KING - HIGHLY-CONFIDENTIAL 1 1 2 2 which is was there another group that was also balance sheet that represented what it had 3 3 marking securities. Is that right? ultimately purchased by way of this transaction. 4 MR. As a formal matter, it is always the 8 a determination of what it thought was the 9 trader's responsibility to mark a book. As a 9 appropriately price tested valuation for the 10 10 practical matter then, there are price testing securities that were acquired on the acquisition 11 groups that are within that product control group, 11 date. 12 PCG function, that have a responsibility to assess 12 Q. Under normal 22 happening on the Friday. At some point that would 22 circumstances, if everything worked well, traders 23 have had to have happened. 23 would mark their books. Those marks would be 24 24 In addition, Barclays would have to picked up by systems -- the same for Barclays as 25 construct the balance sheet, an acquisition 25 any other bank. Those marks would be picked up in

Page 126 Page 127 1 1 KING - HIGHLY-CONFIDENTIAL KING - HIGHLY-CONFIDENTIAL 2 2 transaction, as I said, was not in isolation of was -- no, not to the -- I think it was another 3 the fact that we were acquiring, you know, other 3 list -- to us, it was another list of securities 4 4 that was part of -- I mean, I think by the Friday, things. 5 5 So I never really think of them as it must be the case that I had seen the draft of 6 separate. I thought of it as being Barclays is 6 the asset purchase agreement, so I -- you know, I 7 having to put money out of the door against what I 7 knew that there was a list of these securities 8 know is a portfolio of assets that have an 8 that were in this repo facility, but there were 9 estimated value that hopefully is more than the 9 lots of other things that were subject to the 10 loan, but that doesn't look like a very good 10 purchase agreement as well. 11 trade. So therefore, there has to be other stuff 11 So the fact that from time to time 12 12 that's going on. somebody would ask us, by the way, also there are 13 13 But that's not part of our these other things that look like things, Stephen, 14 14 responsibility. that you would be able to put an estimate of value 15 15 on, and ultimately you will end up risk managing, Q. I guess this is what I am driving at. 16 You told me before that on that Friday, you 16 that would come to me. Then I would respond to 17 17 received 10 -- assets marked at 10 billion dollars them, and I would assume that this was part of 18 that you hadn't expected? 18 something that was a -- the repo transaction was 19 19 A. - Q. So is there a way to assess now, several months later, whether Barclays made money on this pool of assets it received from Lehman?
- A. We made -- some assets were sold at or above their marks, and many of them were sold below, and many of them are still there.
- Q. Let me ask it differently. Has Barclays undertaken some kind of after-action assessment or any kind of assessment or review to see if, in fact, they made money on the securities and other assets that they acquired from Lehman?
 - A. No.

- Q. You have never seen any reports to that effect or any kind of spreadsheets to that effect?
- A. At various times, at various times, more for management reporting purposes I think than financial reporting purposes, we, my group or Barclays had -- product control has attempted to describe how much money was made or lost over a

Page 135

KING - HIGHLY-CONFIDENTIAL period of time on certain aspects -- certain assets.

A -- I think it was included, I think it was included in a footnote to the year-end financial statement, is the acquisition balance sheet for Lehman. I don't remember whether it was actually published or whether I just saw it and it was somehow integrated into it. I think it was published.

You know, that report is a negative goodwill number, is purportedly a profit of the acquisition, but it includes many things that are nothing to do with the assets that we have talked about here because it includes items such as goodwill, real estate, receivables, et cetera.

So there was -- there is a statement there about supposedly some number that is attached to the profitability. But I think of that as an accounting requirement report for financial reporting purposes of the transaction.

But that describes the valuation of the securities according to a set of rules that are influenced by accounting guidelines and rules on a particular day. And I think the date that

Page 136

Page 137

KING - HIGHLY-CONFIDENTIAL was picked was the 22nd.

And a very sophisticated set of rules were developed over the subsequent months that would guide PWC and Barclays' product control and finance to be able to be comfortable that it had adequately come up with an asset value for these assets and for other things that were -- so including certain contingent claims that were going to be included on the balance sheet.

But it doesn't say anything there about how much profit or loss was made on those assets after that date, and it is an incredibly difficult exercise to actually aggregate all of that because of the three different places that I described to you that the assets ended up.

Some assets were sold to traders and then they subsequently sold them. So there is a P&L item, if you like, that turns up in the negative goodwill that's on that acquisition balance sheet. There is a P&L that we experienced between what was the price that PMTG seemed to acquire the assets and where it sold them to the desks, and then there is another item where the desk sold it to the street and there are gains and

KING - HIGHLY-CONFIDENTIAL

losses on the various hedges, and I'm using that word in the way you were using "hedges," the various instruments that were used to try to risk manage while the assets were in situ in the P&L. There is the gains and losses on those.

So I have never seen a number which says how much did we make.

Q. I think I understand what you are saying, but the disclosure that was made in the financial statement is a snapshot of the gain on acquisition, right? It doesn't even purport to cover gains that might have taken place later as to those securities?

A. Or losses, more importantly losses, right.

- Q. So my question is, I see the snapshot of the gain on acquisition of about 4.2 billion dollars. Has Barclays undertaken any efforts after that to assess what we are talking about, the possibility that it gained or lost on all the securities it acquired?
- A. Not in an isolated way. Clearly, all those gains and losses are part of the normal P&L that all of the desks report, but there isn't a

Page 138 Page 139 1 KING - HIGHLY-CONFIDENTIAL 1 KING - HIGHLY-CONFIDENTIAL 2 2 line item -the assumed assets and liabilities of the 3 3 Q. And in fact, we have seen a lot of 3 We mostly mark our positions as if 4 that during the course of the last two years, of 4 there was an orderly disposal. Not necessarily 5 5 course, as so many counterparties have defaulted that that's what we plan on doing with them. We 6 6 on obligations and their assets have been seized might hold them, might sell them. There is lots 7 7 of things we try to do, but we try to keep that and liquidated. 8 8 concept in mind. Under normal circumstances it is not a 9 straightforward process. In marking our books, we 9 At this stage, on Monday, the 22nd, 10 10 this balance sheet, the valuation adjustment was have to try to assess whether or not we are 11 11 supposed to use those pricing points in marking equal to the difference between -- I think it was 12 12 assets. the 45 point -- Thursday close. That would L 5 15 have been, if memory serves, the BoNY marks for one party to another party at that price. 16 16 Somebody was willing to trade. But they weren't the portfolio. 17 17 really willing to trade -- it wasn't particularly And -- there is a little bit of P&L in 18 18 by design that they traded there, they had to here. I think that is probably carried, and then 19 trade, it was sold. Maybe it was seized and sold 19 the valuation adjustment on this day, this isn't 20 20 or they needed to sell it to create liquidity, but necessarily on subsequent balance sheets, but on 21 21 it wasn't exactly orderly. this day would be equal to the difference between 22 22 So on that page 389-B, where it says the BoNY -- I think the BoNY marks and our current 23 "orderly liquidation mark and bidding comp," 23 best guess, based on everything that we have got 24 24 that's kind of -- it's trying to highlight there available to us, of the orderly liquidation mark. really is a little bit of a difference between the 25 So it is trying to get from one number

With time, both of those, the 2 to Barclays' marks, BoNY prices and Barclays' 3 3 definitions of those were clarified, but that was marks. That's precisely that. what this was on that date, and that's why Gary Q. The BoNY price of 45 billion is the 4 4 5 refers to it as valuation adjustment, as S. KING - HIGHLY-CONFIDENTIAL numbers. It is probably not the Monday numbers,

because it is produced on Monday. I suppose it is produced late on Monday.

But it doesn't separate out the unencumbered assets that we had already received by that point. It doesn't separate it out. So I think that everything that we had received to this point was in that number.

Q. Back to the 2.83 valuation adjustment. How did you come up with that 2.83 number? Is that the top-down analysis we talked about earlier?

A. No. We never came up, so we, my group never came up with 2.83. 2.83 is a difference between a set of marks and our marks. So it is not like I come up with -- it is not that I come up with 2.83. We would come up with on here 42.55 as a -- on the spreadsheet or the inventory, and say we've marked all the individual line items, and then product control will tell us at that -- based on all your individual marks or your best estimate here -- I think by this date we were still working on spreadsheets -- we estimate that what we have got is worth 42 and a half billion

Page 151

 $\label{eq:KING-HIGHLY-CONFIDENTIAL} KING-HIGHLY-CONFIDENTIAL \ dollars.$

Then they would compare that to the marks for some of the inventory at the BoNY marks, and that's what that last paragraph says. It said the trades are initially booked at BoNY prices, so no one is calculating the 2.83. The 2.83 is the difference between the BoNY marks and the desk marks.

Q. And the desk marks are -- Barclays is going CUSIP by CUSIP and putting a mark in for --

A. Where possible, yes. Where possible. And it is the best guess by the desk, by my desk using input from as many other sources as we possibly can of an orderly liquidation mark, not where we would -- if we were to -- if we had turned around and asked somebody to bid on this day for 42 and a half billion dollars worth of securities, it would have been 30-something billion.

Q. I understand that. I'm just trying to understand the origin of the marks that Barclays put on it. Did Barclays adopt marks that Lehman had put on these assets?

A. No.

Page 152

KING - HIGHLY-CONFIDENTIAL

Q. (I have heard testimony in other instances where Lehman valued those assets at 42.9. This appears to be very close to the Barclays marks. Did you have any consideration or discussion between Lehman and Barclays as to their own marks?

A. Well, some of the marks were -- we actually used to make the unfunny joke that 42 and a half versus 49, you know, or 50 versus 48 and a half, it is kind of close. It is -- that's half of a billion dollars, so that's a gap. That's 500 million dollars of, you know, rounding.

And that would have come from more of a -- it just sort of highlights just how much uncertainty there was. You would be very surprised if there was absolutely no relationship between the BoNY marks, the JP marks, the Lehman marks, the Barclays estimates. If they weren't of some similar order of magnitude, you know you have a major failing of a control system somewhere.

But still, I don't -- we never really needed to use the Lehman marks, other than -- the only place where we used the Lehman marks was where we had no idea what the security was other Page 153

KING - HIGHLY-CONFIDENTIAL

than a CUSIP, some generic name, and the Lehman mark, then we would have said we will value it at a discount to the Lehman mark because we have nothing else to go on. It could be worth nothing.

Many of them were worth nothing. Not because Lehman had -- bear in mind, the Lehman marks were from days -- they were old, they were what we call stale. Many of them were -- I think most of the stuff we were looking at earlier was on the 12th, which was before the bankruptcy of Lehman Brothers Holdings, and even during that previous week, most of the traders were out -- at Lehman were more worried about their own futures than necessarily marking their books, and markets were already very, very distressed.

So the idea that those markets were good on -- those marks were good on the 22nd after two bankruptcies and Merrill being acquired by -- or being bailed out, is -- there is a tremendous -- you know, the value of them is that -- so there were cases where we said -- and some of them were appropriately marked by Lehman but worthless to Barclays.

A good example would be there were

ROMAIN - HIGHLY CONFIDENTIAL 1 2 2 the valuation as of the 22nd of September as it's a case of valuing as at based off market 3 3 opposed to the 30th of September? data which is relevant as of that date. So 4 4 I'm not sure if I'm understanding the A. There was discussion with auditors 5 as to what the appropriate date to include in 5 question. 6 our books and records was for these. The two 6 O. I think towards the end of your 7 7 dates -- the two relevant dates were the 22nd answer you answered it. So let me see if I 8 understand it. 8 of December and the 22nd of September. 9 9 Because you've got the transaction date and A. Yeah. O. For the items that you received L 0 you've got the date you receive the assets and 10 1 there's two different ways of viewing the 11 from JPMorgan Chase on December 22nd, on or 12 12 transaction from an accounting perspective about December 22nd, your traders went back to 13 13 purely the decision which was reached was to market data to try to value those assets as of 14 14 use the 22nd of December. the 30th of September; is that right? .5 Q. How did Barclays calculate its 15 A. There had been previously drafts 16 6 of expected values which predated the 22nd of front office values as of the 30th of 17 17 September for these assets which it did not December. And the 30th of September was a 18 receive until the 22nd of December? 18 date which was looked at on a consistent basis 19 19 A. I can talk to the general process as the understanding as to the identity of the 20 20 of valuation as at the date. In terms of how assets that we would receive changed. And 21 21 then when we reached the 22nd of December, the the front office went about its -- how it went 22 about it in a historical sense, the processes 22 22nd of -- the valuation as of the date the 23 23 would have been the same and were the same. items were received were updated and were 24 But struck at a different date. We had the 24 focused upon. There was not a great deal of 25 items -- we had the identity of the items. So 25 focus on the 30th of September values at that Page 92 Page 93 G. For that column, column C. 4 Q. Again, just so I understand what 4 A. That exercise wasn't done for the 5 5 first time until the 22nd of December. The you're telling me, are you saying that you 6 6 knew as early as the 30th of September the understanding as to the items would have 7 7 list of assets that you eventually received on changed as understanding as to what items 8 8 December 22nd? would be received changed in the days and 9 9 weeks preceding the 22nd of December. So it A. No. 10 Q. No. When did you first know what 10 wasn't a new process, let's value them on the 11 11 specific assets you would be receiving from 30th of September, on the 22nd of December. 12 JPMorgan Chase? 12 That wasn't the first time where people were 13 13 A. I'm not sure what date that that looking at that. Over the period -- over the 14 was absolutely finalized. 14 period from the acquisition date up until the 5 15 Q. So, again, I'm going back to this 22nd of December there was an ongoing process 16 16 process that was followed in coming up the to try and get a handle on what value - what 17 17 with the column C values which is the front assets and what value of assets we would end 18 18 office values. Was it a process where your up receiving. And that was again an iterative 19 traders in December, sometime in December got 19 process. This just represents a part of that 20 20 a list of the JPMorgan Chase assets by CUSIP being two month-end values and the actual 21 21 number and went back to historical pricing value that we received. 22 22 data to try and price those as of the 30th of Q. P. EXALL - HIGHLY CONFIDENTIAL you what's going to happen here but basically I'm going to ask you a series of questions.

You're under oath. You're going to answer the questions as best you can.

At some point during the deposition you might hear your attorney voice an objection to either preserve an objection or challenge a question that I might ask. That doesn't relieve you of the obligation to answer the question. You still have to answer the question. I might change the question in response to his deposition -- to his objection but unless he instructs you not to answer you still have to answer the question. Okay?

A. I understand.

L3

.5

Q. In that regard if I ask a question that's a little bit confusing or I misuse a term that you folks use or an abbreviation that you folks use, please correct me and ask me to clarify the question. I want to have a clear question so I can get a clear answer, okay?

A. Okay.

Q. Did you prepare at all for today's

P. EXALL - HIGHLY CONFIDENTIAL deposition?

Page 7

Page 9

A. Yes, I did.

Q. How did you do that?

A. I obviously met with counsel and prepared over the course of the past week. And I reviewed insofar as I could the documentation and events around the time of the acquisition insofar as I could recall them and reference them.

Q. Okay. Did any of those documents refresh your recollection about anything in connection with this litigation?

A. Yes, they did. Yes.

O. Which documents are those?

A. I don't recall. I mean, I read through a lot of old e-mail correspondence and things like that that I have in relation to the matter. And I had discussions with people that assisted me in the preparation of the spreadsheet.

Q. And you don't have any specific document that refreshed your recollection about that?

A. Nothing specific.

P. EXALL - HIGHLY CONFIDENTIAL

Q. Okay. You're aware that you've been asked to appear by Barclays as a 30(b)(6) witness on specific topics, correct?

A. Yes.

Q. Okay. Well, let's start off with the 30(b)(6) notice. I'm going to hand you a copy of a document marked as Exhibit 279B which is entitled Debtor's First Rule 30(b)(6) Deposition Notice to Barclays on Issues Pertaining to Accrued '08 FY Liability Under the Asset Purchase Agreement.

And my question is have you ever seen this deposition notice?

A. I have.

Q. Fair to say you reviewed this in preparation for today's deposition?

A. I have reviewed this, yes.

Q. And if you look on Schedule A which is the third page you'll see you've been designated as a 30(b)(6) witness in connection with bonus and severance payments made to former Lehman employees, right?

MR. GREEN: Object to the form of the question. That's not all the

P. EXALL - HIGHLY CONFIDENTIAL schedule says.

MR. HINE: Okay.

Q. But in general you're here to testify about bonus and severance payments made to former Lehman employees, right?

A. I'm here to represent that -- what's represented on the schedule prepared in respect to this deposition.

Q. Okay. Now, that schedule is the schedule -- the spreadsheet referenced in this Schedule A?

A. I believe it to be, yes.

Q. And then a couple days ago we received a replacement or an updated spreadsheet so you understand that that's the subject of today's deposition as well.

A. I do.

Q. Okay. We'll get to that later. I'm done with that exhibit.

Well, before I finish on that did you undertake any investigation in connection with being a 30(b)(6) witness?

A. What do you mean by that?

Q. Well, did you look into any of the

A. Sorry. So let me just be clear. You're asking do I know of any discussions that my senior management may have had with Lehman Brothers?

Q. No, no, no. I'm asking did you have any conversations with senior management during that week, September 15th through September 22nd, about the compensation issues that were being discussed or considered in connection with the Lehman Barclays transaction?

A. I don't recall anything specific. I do know that the initial sale agreement had Page 35

P. EXALL - HIGHLY CONFIDENTIAL been concluded by the time I had come to New York and was beginning to assist Mr. Evans in whatever he needed me to do. And it was my understanding that the transaction was closed at that point.

A. I look back -- I think it was on or around the 20th or 21st of September that I came across. I forget the exact date but I believe it was on or around there.

O. Okav. So you thought the transaction had closed by then?

A. It was my general understanding that the transaction for all intents and purposes had been completed the prior week. I have subsequently come to understand that there was a clarification agreement and officially the judge may have sanctioned at a later date. You know, the legalities for me are neither here nor there. My understanding is that the transaction had been concluded in all material respects at that point.

Q. Okay. Did you have any

Q. Now, my previous question had to do with the schedule. We'll call this the 9/16 schedule if you will. Do you see the \$2 billion compensation number in that schedule?

A. I do.

Okay. Did you, during the week of September 15th to the 22nd say, did you have any conversations with any of Barclays senior management about that \$2 billion comp figure?

A. I was made aware of this schedule during that week.

Q. Um-hum.

A. And I'm certain I would have asked someone questions with respect of the schedule and what I understood it -- you know, what I needed to interpret from it. But, yes, in general I would have had conversations with people on this.

Q. Okay. And who gave you the schedule?

A. Mr. Clackson passed me the

Q. Okay. And was this -- when you said tax table vou threw me there. What did vou mean there?

A. Sorry. It's a term I use. I shouldn't use it. We colloquially refer to it as a tax table. It's in effect if your bonus is X, then there is no deferral into stock. If it's above a certain threshold, a certain proportion of the entire bonus is delivered in stock. If it's above another threshold, further proportion of that bonus is delivered in stock.

let's say, as an example, if you had a hundred pounds of an amount deferred into stock, vesting over four years, if -- you can either have pro rata vesting which is you could take a quarter, a quarter, and 25 would accrue at the end of one, 25 after -- et cetera.

Cliff vesting means that it only vests at the end of the period concerned. So you'd only get the full hundred in this example at the end of the fourth year.

Q. And it was a custom to have a three-year cliff vest period for stock bonuses?

A. It was our custom, yes.

Q. All right. And has this changed since 2008? You said prior to 2008.

A. 2008 was a unique year for compensation and we delivered at Barclays Capital -- at Barclays in a different way subject to a different type of arrangement.

- Q. Okay. All right. Paragraph 3 of your declaration refers to an Exhibit A. It's a Clarification Letter. I can tell you that the version of this that was served to us did not have an Exhibit A, so I am going to give you what was previously marked as Deposition Exhibit 25 (handing) and ask you whether or not this document is the same as what you had intended to attach to your declaration.
- A. This appears to be the final Clarification Letter, yes.
- Q. Okay. So let's look at paragraph 2 of your declaration. The third sentence begins: "I was one of the Weil attorneys responsible for drafting the letter agreement dated September 20, 2008, which was executed on September 22, 2008 by Barclays, LBHI, James W. Giddens as the trustee for the SIPA liquidation of LBI, and LB 745 LLC (the Clarification **Letter)."** Is that correct?

TSG Reporting - Worldwide 877-702-9580 **Messineo - Highly Confidential**

A. That's correct.

- Q. Okay. Did you have responsibilities in connection with the Clarification Letter other than participating in the drafting?
- A. I don't -- I am not sure I understand what you are asking.
- Q. Sure. Were you one of the Weil attorneys who would have been directly interacting in negotiations with representatives of Barclays?

A. Yes.

- Q. Okay. So you would have been speaking to people from Barclays or Barclays' attorneys in connection with the Clarification Letter?
 - A. Correct.
- Q. When I refer to representative of Barclays throughout the deposition, actually I will be intending to mean Barclays as well as its agents, which would be Cleary Gottlieb, Michael Klein, who is an independent financial advisor. So will you understand that to be the meaning as I refer to representatives of **Barclays?**

- A. Yes.
- Q. Okay, great.

Now, paragraph 4 of your declaration, page 2, reads: "I understood at all times while the Clarification Letter was being drafted that both securities and cash were being held in accounts maintained by LBI for the purpose of complying with Rule 15c3-3 for the benefit of and in order to protect the interests of customers of LBI. The accounts so holding securities or cash pursuant to Rule 15c3-3 are herein after referred to as the customer reserve accounts."

Is that an accurate statement?

- A. Yes, it is.
- Q. Okay. Do you consider yourself an expert in SEC Rule 15c3-3?
 - A. No.
- Q. Okay. Had you had any prior dealings with that rule prior to the Lehman/Barclays transaction?
 - A. Only a very small degree.
- Q. Okay. And do you consider yourself to be an expert in the Securities Investment

- A. I do not.
- Q. Okay. And had you had any prior matters that involved interpretation of SIPA prior to the Lehman/Barclays matter?
 - A. Again, only in a small degree.

MS. NEUHARDT: I am going to hand you what will be marked as Deposition Exhibit 683.

(Deposition Exhibit 683, Declaration of Victor I. Lewkow, marked for identification.)

- Ο. Have you ever seen this document before?
 - A. Yes.
- Q. In what context have you seen it before?
- A. I saw it recently in connection with preparation for this deposition.
- Q. Okay. Did you review any other documents in connection with this deposition?
- A. I also looked at one of the memoranda that had been submitted.
 - Q. Oh, that was publicly filed in TSG Reporting - Worldwide 877-702-9580

Q. When you talk about operations function, is there a component of that of your work that covers valuing or marking assets?

A. I want to be very precise about the way I would describe that. There is a function in operations that values positions, but that's using data, pricing data, that is either purchased from a third party or is consumed from a front office trading source, so we are not determining a valuation on a security. We do not determine valuation.

Q. But you mark the security with this information that you receive from a third source?

18 A. It's a mechanical process. 19 Inventory, mark, it gives you a result. It's not -- you are not applying any thought to it 20 21 other than is that actually the security that 22 our mark ties out to.

Q. Could we go back now to your last 24 position you held at Lehman. 25

First of all, how long did you work

TSG Reporting - Worldwide (877) 702-9580

3 A. I worked for Lehman from November 4 27th, 2000 until the 22nd of September, 2008.

Q. And what was the last position you held at Lehman?

7 A. I was global head of operations for 8 both capital markets and IMD. I was in the 9 process of taking responsibility for Aurora

10 loan services, but I hadn't been formally 11 announced, so that was matter of a few weeks'

12 worth of effort, but I didn't have any formal 13 management responsibility at that point, so you

14 will see information in my e-mails associated 15 with Aurora.

O. And who did you report directly to 16 17 in that position? 18

A. I reported to Ian Lowitt.

Q. Anyone else? 19

Α.

21 Q. And who were your direct reports?

22 In the United States, Neal Ullman,

23 who is global head of our clearance and custody

function. Monty Forrest, who is global head of prime services operations. Kirk Butryn who was 25

Q. And who were in charge of those functions at Lehman: do vou recall?

Α. The front office was various different business heads, so, I mean, ultimately it would have been Bart as president and head of risk effectively, but Gelband was responsible for the fixed income division and Jerry Donini was responsible for equities, and the IMD business theoretically didn't take any risk.

Q. I don't mean to be intrusive, but I have to ask you some questions about your compensation.

17 MR. SHAW: This is all highly 18 confidential.

MR. HINE: Yes.

- Q. When you transitioned from Lehman, your position at Lehman to your position at Barclays, did your compensation increase?
 - No, actually, it declined. A.
- Declined. In what way? 24 25

I had a two-year guarantee from TSG Reporting - Worldwide (877) 702-9580

I believe that's all of them from 6 memory. In the U.K. there is a gentleman 7 called Garth Barker Goldie, who is responsible 8 for European operations, and in Asia, 9 Christopher Flanagan, who was responsible for 10 our Asian operations. And there was also --11 actually, there is another gentleman called 12 Stewart Nineham who was my CAO in -- global 13 CAO. 14 Q. Can you explain to me in your Lehman 14

15 role whether your group was responsible for 16 valuing or marking securities? Same question 17 only I am trying to see if the Lehman role was 18 the same.

19 A. It was identical. In terms of 20 consumption of data, any model-driven pricing would be front-end trading, trading responsibility to provide a mark, and finance function at Lehman Brothers, product control, 24 for want of a better term, was responsible for price testing, so they would test the models to

I had a set of actions to perform, 20 A. I believe so. It may have hit my 20 which was providing data to my supervisor, to 21 e-mail. I don't ever remember reading it. I 21 Ian Lowitt, and those components were 22 think it's highly unlikely that I saw it until 22 clearly -- at certain points it became clear after bankruptcy, and it's certainly the case 23 they were part of the transaction, but I didn't 24 that I was asking Jonathan Hughes post know what part, and I had very limited 25 bankruptcy -understanding. Did you ever hear anyone talk about 14 making lists of securities was different than a discount that was being awarded to Barclays 15 15 determining what they should be worth in 16 with respect to Lehman assets? 16 aggregate. 8	I had to go back and read the question,
9	9 sorry, I've muddled the two together, yeah,
10	because the question was, can you tell from
11	the statement the value of the positions,
12	which is correct, you can.
13	But can you tell the value of those
14	positions prior to them being liquidated?
15	No, you can't, which is what I just want to
16	clarify.
17	clarify.So can you look at a statement and
18	tell what its value is going to be? No.

A. No, it doesn't. Q. Why is that? A. There is no lots. There is no designation of house and customer. Or firm or affiliate. There is no designation. It doesn't tell you who these positions belong to. It doesn't give you the number of lots. Q. OK, do you know whether Barclays asked for the information about lots, clear value, client and house positions that you say is missing from this report? A. I don't know. Q. HIGHLY CONFIDENTIAL - J. HRASKA answer the questions.

On occasion, your counsel will state an objection or, you know, make some kind of objection for the record. That doesn't relieve you of the obligation to answer the question. It's just him trying to either correct a portion of my question or preserve an objection.

In that regard, throughout the day, I am undoubtedly going to a misuse a word or some kind of acronym or some technical term that you folks use every day in your line of business which I'm not as familiar with as you are, obviously, so please correct me if I misuse a word or I ask a question that's misleading in any way or you just don't understand the question because I would like to ask a clear question so you can answer it.

Is that okay?

A. That's fine. Thank you.

MR. SHAW: Just before we begin, again, I want to put on the record our understanding that we will designate the entire transcript highly confidential and then we'll go back and redesignate.

fine.

Q. One other thing before we get started, Mr. Hraska. I imagine you're aware that you've been designated as what's called a 30(b)(6) witness by your employer, by Barclays, as to particular topics, and they relate to Schedules A and B which we'll discuss later. So when we get to that portion of the deposition, I'll let you know and we'll treat that portion as a 30(b)(6) deposition, but I'll let you know as we get there.

MR. SHAW: Just so we're, again, clear, Bill, as I think you know, he is one of several witnesses who's been designated as partially responsive to those particular topics.

MR. HINE: I understand.

- Q. So, unless you have any questions, we can get started.
 - A. No, I'm fine.
- Q. Okay. Can we just review briefly your employment history with Lehman? What was the last position you held at Lehman? I'm talking

Secured Financing Operations Group.

Q. And can you just describe for me what that means? What were your responsibilities and duties in that position?

A. The Financing Operations, also known as a financing middle office, is a group that sits between a bunch of groups, but primarily trading and sales individuals and clearance and settlements folks, and we do tasks such as, you know, monitoring positions, reconciling differences, dealing with, you know, customer, you know, concerns, bringing the attention of customers' concerns to either sales staff or trading staff.

We also deal with legal and compliance and regulatory on certain matters. If there are, you know, questions or queries as to the nature of the transactions, if somebody needs some technical expertise on, we usually provide that expertise as to the structure of the transactions and things like that.

Q. And who did you report to in that position?

A. At Lehman Brothers at the time, I was reporting to Monty Forrest.

Q. Did you report directly to anyone else?

A. No, under that structure I was a direct report of Monty Forrest.

Q. And who were your direct reports?

A. My direct reports now or at the time?

Q. At the time in September of 2008.

A. Okay, my direct reports in the U.S.

were Nancy Denig, D-E-N-I-G, and Paul Lindner.

Q. Prior to this position -- or, let me ask you another question. How long were you in this senior vice president position?

A. Approximately five to six years. I don't remember the exact date, actually. I don't remember the exact date when I got my senior vice presidentship.

Q. Okay. How long had you been in the position of managing the secured financing?

A. It began in 2001, but it began in a much smaller scale. I only managed a portion of

Again, I'm was we had placed cash as well as an asset to 22 talking Friday of that week. Barclays, and, you know, my understanding at the 23 A. Friday of that week, I -- it was my 24 time was that I was looking to, in addition understanding that we were looking to substitute 25 to -- I was looking for assets that would be the cash that we had placed on deposit for the

Page 50 Page 51 HIGHLY CONFIDENTIAL - J. HRASKA 1 HIGHLY CONFIDENTIAL - J. So, yes, Lehman could get a return of lending transaction to collateralize a cash loan 4 4 the cash in lieu of assets. So a substitution 5 5 with cash. So we were looking to find available of one asset for another. assets which were suitable under the repo 6 6 Q. And were you able to come up with any 7 7 agreement to substitute. assets to do that? 8 8 Q. How much cash are we talking about? A. Yes, I was. On Friday. 9 9 A. On the night of the 18th, Lehman Q. How much? Brothers placed \$7 billion on deposit for the 10 A. Approximately a billion, just a little 11 benefit of Barclays. 11 over a billion. Something like a billion-34, 12 -35, something along those lines. Q. Just so I understand it, in layman's 13 terms -- well, before I ask that, let me -- was Q. Okay. And did those assets in fact that cash part of the \$42 billion that you 14 get substituted in and make their way to 15 mentioned? 15 **Barclays?** 16 A. It was not. 42 billion was the value 16 A. Well, they made their way into 17 of the assets, physical securities, that had 17 Barclays. My expectation of a return of the 18 made it to Bank of New York for the benefit of 18 cash never occurred. 19 Barclays. 19 Q. Why is that? 20 Q. And so there was \$7 billion in cash on 20 A. Well, with the mechanics and 21 top of that? everything that happened with the relationship A. Yes. 22 with Chase that day, Chase didn't return any of Q. And so am I correct to say you were 23 the cash at that point. 24 trying to locate other assets that could be 24 Q. Can you explain to me the problems you 25 transferred to Barclays so Lehman could keep the had with the relationship with Chase that day? Page 52 Page 53 1 1 HIGHLY CONFIDENTIAL - J. The morning of the 19th, Chase had 2 o'clock range, that was the last conversation I 3 effectively shut down our clearing accounts and 3 had with anybody at Chase. stopped having communication with anything other 4 4 Q. What was that about? 5 than I think some very senior folks in Lehman 5 A. That was primarily about --6 6 Brothers. The last conversation or the last 7 Q. And why did they do that? 7 series of conversations? 8 MR. SHAW: Objection. Foundation. 8 Q. Last series of conversations? 9 A. I don't know particularly why they do 9 A. The last series of conversations were 10 that. I mean, there was, you know, there was 10 in relation to securing a loan to create the \$7 11 some speculation as to why they did that because 11 billion which we placed on deposit with 12 of the status of our situation from a credit 12 Barclays. 13 perspective and things like that, but I don't 13 Q. I see something referred to in the 14 know if there was a particular trigger that 14 documents as a box loan. Is that the loan 15 caused them to do that. 15 you're talking about? 16 16 Q. Did you have any conversation with A. The 7 billion was a box loan, yeah. 17 folks at Chase about this? 17 Lehman took a box loan from Chase and let -- as 18 18 A. On the morning of the 19th, no. a result, Chase puts a lien on the assets for 19 Q. At any time? 19 that \$7 billion in cash, yes. 20 20 A. I mean, I had conversations with folks O. What assets was that lien on? 21 21 at Chase all through the night on the 18th, A. There were assets which were 22 actually, technically, I guess into the morning 22 unencumbered assets sitting in Lehman's 23 of the 19th while we were trying to finalize the 23 clearance boxes at Chase. 24 transaction. And after the morning of the 19th, 24 O. Is that an identifiable set of assets 25 25 I guess the very early morning, like in the 1, 2 that now has a lien on them from Chase?

Page 58 Page 59 HIGHLY CONFIDENTIAL - J. HRASKA 1 HIGHLY CONFIDENTIAL - J. HRASKA 1 2 2 A. It turned out that that was the case. O. Right. 3 It was initially intended to be all collateral, 3 A. The price, the prices, are the prices 4 of the individual collateral that make up that 4 but the market value of what we were to transfer 5 5 loan, and in order for a loan to be effective, initially was \$50 billion. 6 Q. Okay. And Barclays was, after the --6 the value of the price times the par amount of 7 7 the collateral should exceed the principal after they received the proceeds of the loan and 8 8 the collateral, was Barclays satisfied that it extended. 9 9 had received the entire amount of collateral Q. Okay. Is that what's known as the 10 10 haircut, the amount by which it exceeds? that it was expecting with respect to that repo? 11 A. The amount by which it would exceed 11 MR. SHAW: Objection. Foundation. the loan is known as the haircut, that's 12 A. Yeah, I don't know whether they were 12 13 satisfied or not. I mean, we completed the 13 correct. 14 securities transfers until the point that we Q. And so what was the haircut associated 15 with the September 18 repo? 15 couldn't make any transfers because the system 16 16 had been shut down, and we were requested at A. There wasn't a -- there wasn't a 17 17 specific stated haircut. There was a total loan that point to deliver an additional 7 billion in 18 amount, which was this \$45 billion, and the 18 cash, which we did. 19 total collateral value that we were trying to 19 Q. Okay. When was that transferred, 20 20 transfer over to Barclays or what we were approximately? 21 directed to transfer over to Barclays was 21 A. The 7 billion in cash? 22 approximately \$50 billion. 22 Q. Yes. 23 Q. And that \$50 billion was comprised of 23 A. Somewhere between 2 and 3 o'clock in 24 the approximately \$42 billion in securities that 24 the morning on the 19th. 25 25 Q. Friday? you mentioned earlier plus the cash? Page 60 Page 61 1 HIGHLY CONFIDENTIAL - J. HRASKA 1 HIGHLY CONFIDENTIAL - J. HRASKA 2 2 A. Well, it was -- it was -- we worked O. So that makes the haircut 3 through the night of the 18th. So I guess it 3 approximately \$5 billion? was very, very early in the 19th. So it was the 4 4 A. That would be correct. morning of the 19th at like maybe 2 o'clock in 5 Q. Do you know what the haircut was for 5 6 the morning or something like that. the Fed program earlier in that week? 7 Q. So, back to the notion of a haircut, 7 A. I don't. Again, the haircut, each security class had its own individual haircut, 8 the haircut for that transaction is the 8 9 difference between the approximate \$50 billion 9 so there would have been a, I guess what's 10 10 called a synthetic haircut, which, you know, in collateral and cash that was transferred to 11 11 Bank of New York and the 45 billion that would equate to something similar to what you 12 12 Barclays transferred to Lehman, correct? did there, you know, so -- and I believe it was 13 A. Could you repeat that one more time? 13 similar because the transaction was described to 14 14 me as we were going to take the extension of I'm sorry. Q. I'm just trying to figure out what the 15 financing that the Fed had offered to Lehman and 15 16 haircut is for that transaction. I thought you 16 we were going to help effect the transfer of 17 that to Barclays so that Barclays could then 17 said that approximately 50 billion was transferred to Bank of New York or Barclays? 18 step back into that transaction. So I believe 18 19 it was similar. I don't know exactly what the 19 A. That's correct. 20 O. In the form of either collateral or 20 haircut was. 21 Q. Okay. And who described the 21 cash? 22 22 transaction to you like that? A. Uh-huh. Q. And that Barclays gave Lehman 45 A. John Rodefeld, who was held of North 23 23 American Operations at the time, had contacted 24 billion in cash? 24 25 Alastair and myself to talk about the A. Right, that's correct.

Page 62

HIGHLY CONFIDENTIAL - J. HRASKA transaction.

Q. And what did he say about it?

A. He basically told us that Barclays had been contacted by the Fed and Barclays was asked to provide a credit, a counterparty credit upgrade to the Fed, in essence. They were fine with financing the collateral basket that they were financing, but they would prefer not to have Lehman as a counterparty on the other side of that.

They asked Barclays to basically intermediate a transaction where Barclays offered Lehman the same financing that they had been -- that the Fed had been financing with them throughout that week, and then that Barclays would take that collateral and place it back on deposit with the Fed to make them whole on the cash transaction.

Q. I think I understand what you just said.

What else did Mr. Rodefeld say on that call?

A. Well, that call was on the 17th, and they initially were looking to actually effect

vot

Page 64

HIGHLY CONFIDENTIAL - J. HRASKA of the parties. Purely from the size of the transaction, it was an extremely large transaction, and the number of securities involved were in the multiple thousand range, you know, I would say in the double-digit thousand range. So that was one of the issues.

So not just from a transactional perspective, but also from a static perspective on the Bank of New York's side, they didn't have a lot of these securities set up on their systems. It was going to take them time to set the securities up to be able to set up receipts for these securities and things along that nature.

Q. So how was it possible to do it on Thursday as opposed to Wednesday?

A. People were working 24 hours a day to get it done and bunches of people were brought in to help set things up and there were technologists brought in on all different sides to help do away from ordinary type transactions and things like that to get the securities transferred.

Q. So am I correct to say that you

Page 63

HIGHLY CONFIDENTIAL - J. HRASKA that transaction the same day on the 17th. And then, you know, with some subsequent conversations, it just became -- it basically became an impossibility not just for Lehman Brothers, but for Bank of New York, JPChase, Barclays to do a transaction of that magnitude in the course of a day.

So from the 17th through the -basically the whole 17th into the night of the 17th and even morning of the early 18th, we discussed the mechanics on how we would effect that transfer in the most efficient manner.

Q. So do you recall anything else about what Mr. Rodefeld told you on that call?

A. Not other than what I just described to you.

Q. So am I correct to say that the initial intent was to have this transaction take place on the Wednesday of that week?

A. From the first phone call, yes, it was intended to take place on Wednesday, but...

Q. And just why mechanically was that not possible?

A. There were numerous reasons from each

Page 65

HIGHLY CONFIDENTIAL - J. HRASKA

learned of the possibility of this transaction sometime on Wednesday, late Wednesday, and then people worked through Wednesday night and then all the way through Thursday night to get it done?

A. That's correct.

Q. Okay. Did the nature of that transfer change at all? In other words -- let me rephrase that.

You just described what Mr. Rodefeld told you about the transaction. Did that transaction change at all over the course of that Wednesday into Thursday?

MR. SHAW: Objection. Foundation.

A. The nature of the transaction itself, the spirit of the transaction, nothing changed, no.

Q. Okay. That makes sense.

A. Could I -- I apologize.

second to just talk again about your understanding of the transaction between Barclays and Lehman.

Did you ever have any understanding that there was supposed to be a discount associated with that transaction?

- A.) Which transaction? The repo transaction?
- Q. No. No, the sale transaction between Barclays and Lehman.
- A. I didn't have any knowledge as to what the terms of that transaction were.
- Q. Did you ever hear the phrase "block discount" used in connection with either that transaction or the repo that we have been talking about?
 - A. No.

- Q. Did you ever have any understanding that Barclays was going to be paying less than full value for the assets that it was buying from Lehman?
 - A. No.
- Q. Did you ever hear any discussion about the possibility of defaulting on the repo that

Page 67

HIGHLY CONFIDENTIAL - J. HRASKA we have been discussing?

- A. There was discussions related to that topic on the week of the 22nd.
- Q. Tell me what you recall about that, those discussions.
- A. Well, there was -- it was news that obviously LBI had filed for I guess SIPC protection. So the margin folks had contacted me on the morning of -- I don't know which morning, I believe it was on the 22nd, but if not, on the 23rd, to ask me if that transaction was being considered a default by Barclays. And at the time, I didn't know, but there was -- I then had conversations about whether that was going to be treated as default with my manager, and at the time, you know, we didn't actually know when it was or if it was going to be treated as in default.
- Q. When we talk about "it," we're talking about the September 18 repo?
 - A. Repo itself, yes.
- Q. And LBI filed for bankruptcy on Friday, the 19th?
 - A. That's my understanding.

Page 69

HIGHLY CONFIDENTIAL - J. HRASKA

- Q. And so you had conversations the following Monday about this?
 - A. Yes.
 - Q. And who were the conversations with?
- A. I don't recall specifically. Somebody from the Margin Group. I don't recall specifically who it was from the Margin Group that I had a conversation with. And I also had a conversation with Monty Forrest, which is my manager.
 - Q. The Margin Group at Barclays?
- A. The Margin Group at legacy Lehman Brothers
- Q. Do you recall the names of the individuals that you spoke to?
 - A. No, I just said I didn't recall it.
- Q. To your understanding, was the September 18 repo unwound in some way?
- A. To my understanding, it was defaulted and the collateral that was put up to securitize that loan was seized by Bank of New York for the benefit of Barclays.
- Q. Okay. And did Bank of New York also seize the cash that had been posted?

HIGHLY CONFIDENTIAL - J. HRASKA

MR. SHAW: Objection. Foundation.

- A. The cash itself was not in an account that or in a position for Bank of New York to seize. The cash itself was being held for the benefit of Barclays at JPChase.
 - **Q.** Okay. And what happened to that cash? MR. SHAW: Foundation.
- A. Barclays, because the cash was put into the account of their benefit, they -- later I understood, and it would make sense, that they claimed ownership of that cash. What happened to the cash after that, I sort of was removed from the transaction after they laid ownership claim to that cash.
- Q. Okay. I guess do you understand that there was an ensuing dispute between Chase and Barclays as to the ownership of that cash, among other things?
 - A. I did, yes.
- Q. And were you involved in that resolution of that dispute?
 - A. My only -- not in the resolution, no.
- Q. What was your involvement in connection with that dispute?

Q. Why were Lehman's stock records not fully reconciled over that weekend?

A. Well, as I'm sure you're aware, the financial markets were going through down -quite of a meltdown in that period and, more specifically, Lehman Brothers. There was an inordinate amount of activity going through our clearance boxes, through our front ends and back ends processing systems.

In addition to that, there were relationship troubles with JPMorgan Chase, and as a result of that, there was information that was typically received, like file transfers that represent statement balances and things like that, that we would normally expect to receive from your custodians which were not sent to

Page 251

HIGHLY CONFIDENTIAL - J. HRASKA Lehman Brothers on either the night of the 19th or during bat cycles on the 20th. So it was very difficult to do a reconciliation without a complete set of data.

Q. Did you ever get to have a complete set of data such that you could make that reconciliation?

- A. The firm received additional data. I personally wasn't in charge of those reconciliations. So, as to the nature of its completeness, I couldn't testify to that.
- O. Who was in charge of any subsequent reconciliations of the firm's stock records? And my question is with respect to Schedule B or subsequent iterations of Schedule B, as far as you're aware, sir.
- A. Well, that's two questions. So there's a group that's responsible for the stock record reconciliations, which is the firm Balancing Department, which I don't remember who was in charge of it at the time, but it would have been the firm Balancing Department that's responsible for that in conjunction with the Clearance folks.

Page 252

HIGHLY CONFIDENTIAL - J. HRASKA

They focused on putting the stock record back in balance, but I don't know whether there was any reconciliation once the stock record was back in balance to the original Schedule B.

- Q. The securities that were transferred from Lehman to Barclays on the 19th?
 - A. Yes.
- Q. Was it your idea to transfer those or was that the idea of someone you reported to?
- A. It wasn't that it was a unique idea of my own. What it was, it was a normal course transaction, which we had previously deposited cash as a result of the problems we had the night before.

And in a repo transaction, I think I mentioned earlier, you typically wouldn't deposit cash to get cash. So it's, you know, it's a normal course transaction and it was a situation where you're not using your collateral efficiently to try to find substitute collateral. Especially in a tri-party arrangement, you have full rights to go ahead and do that, and that type of transaction is

Page 253

HIGHLY CONFIDENTIAL - J. HRASKA

typically affected by Operations personnel, not Trading personnel.

So, you know, I discussed with the folks at Barclays the previous night and, you know, and at Lehman that we were going to, you know, the next morning we were going to look to do exactly that and replace the cash with, you know, substitute collateral.

- Q. Can you be more specific about the names of the people you discussed this with?
- A. At Barclays I spoke to John Rodefeld about it, and at Lehman I would have spoke to Monty Forrest and Alastair Blackwell about it.
- Q. And did Mr. Forrest and Mr. Blackwell approve of this transaction?
- A. Yes, they understood it to be a normal course function that I would have done at any other point in time.
- Q. So I'm clear, it was something that -this transfer of approximately \$1.1 billion was done on your initiative, correct?
 - A. That's correct, yes.
- Q. But what you say is this is something that was --

Page 254 Page 255 1 HIGHLY CONFIDENTIAL - J. HRASKA 1 HIGHLY CONFIDENTIAL - J. HRASKA 2 2 A. Commonplace. Q. Do you recognize this document, sir? 0 10 Q. And just so the record is clear, no cash was ever returned to Lehman in return for 11 Q. The subject is pledges. It says, 12 12 this transfer of \$1.1 billion in additional "Paolo," and you write to Mr. Tonucci, "We 13 13 managed to pledge over about 800 MM in MV to unencumbered collateral to Bank of New York on 14 14 BarCap." I have a few documents to show you. and "MV" is market value. So the assets that we 17 17 (Exhibit 147B, an e-mail sent from Mr. had pledged over up to that point were, in our 18 18 estimation, from the, you know, our systems, the Hraska to Paolo Tonucci, copying others, on 19 Friday, the 19th of September, 2008, marked 19 way we had them marked, was worth about 800 20 20 for identification, as of this date.) million in value. 21 21 Q. Bayne. 13 Holdings, Inc. in connection with all the 14 bankruptcy proceedings that are going on. 14 Is that you? 15 So your deposition today is in 15 A. That is my maiden name. 16 Q. So if I see --16 connection with those proceedings and some discovery that we are taking in those proceedings. 17 17 A. Unfortunately when you were at Lehman, 18 Have you ever been deposed before? 18 when I got married -- my user profile before I got 19 19 married was N. Bayne, which was my maiden name. A. I have not. 20 When I got married, in order for them to change 20 Q. Very simple. I am going to ask you a 21 bunch of questions. You are under oath, you are 21 the user name, they would have had to delete me 22 22 going to give me truthful answers. from the system altogether and I would have to 23 On occasion your counsel will raise an reapply for all my applications, which I didn't 23 24 want to do because I was already four years into 24 objection or interpose an objection. 17	42 billion is what they received.	17	Q. And the box meaning what?
18	Q. OK. So 42 is not the shortfall, 42 is	18	A. Our free collateral box, meaning any
19	what ultimately did make it?	19	assets that didn't get delivered over to BoNY and
20	A. Yeah.	20	was still in the possession of Lehman Brothers,
21	Q. Was there a 7 or 8 billion dollar	21	Inc.
22	shortfall, do you recall?	22	Q. And is that the 074 box?
23	A. Yes.	23	A. No, it was a Chase box.
24	Q. Is that the genesis of what I have	24	Q. OK. 074 box is separate?
25	seen referred to as box loan?	25	A. That's a DTC box.

But what I principally remember when I walked in was a negotiation or a dispute, I frankly couldn't tell when I walked into the room, between Mr. Cox of Barclays, and Mr. Cutler of Chase, and my understanding going to Weil Gotshal was that there was an issue that could prevent the closing, and it became apparent, when I arrived at Weil Gotshal, that that issue appeared to be an issue between Chase and Barclays because there was a substantial and sustained discussion between Mr. Cutler. And I believe some of the Wachtell lawyers were with him, but I just don't recall, and Mr. Cox. And that ensued -- if I arrived at 5:00 or so, that had to ensue for a couple of hours.

Q. Did you participate in any other discussions between then and -- and the closing on Monday morning?

A. Well, first of all, I clearly did not participate in any of those discussions. I walked in, in the middle of them, and at best was trying to make heads or tails of what could

KIPLOK - HIGHLY CONFIDENTIAL possibly prevent the closing.

You know, to be clear, that entire weekend we were focused on transferring accounts and what, in our view, was fulfill the public interest of the deal, which was moving as many accounts as possible, and then, secondly, preparing for the days and weeks of the SIPA case that would follow.

It was never my intention to participate, nor frankly seeing what I walked into, did I have the resources to participate in the discussions that were occurring either in that conference room or on the phone. So, I first say that.

There was initially that discussion with Chase. Later in the evening there were discussions, I recall, involving issues that DTCC had. And, again, I was trying to monitor those discussions, and as the night wore on, there were some multiple documents. But we were, frankly, doing all we could to be sure the closing occurred so that the transfer of accounts happened. We were looking to the days and weeks to come. We thought the deal had been done Friday evening

Page 28

Q. Tell me what you recall about this issue involving the DTCC.

A. I recall the DTCC had some concerns regarding its exposure, and -- and the collateral available to cover that exposure. I -- I don't recall much of the specifics. I -- I do recall that DTCC issues were, in part, discussed at some point late in the evening around midnight or 12:30. The whole -- there were many occasions, by the way, when I refer to this group, where the group would disburse.

And I recall Barclays had two or three conference rooms, and Weil was obviously in their firm, so Lehman had two or three conference rooms. The Creditors Committee had a conference room, all filled with their professionals. And there would be these gaps in the evening where, frankly, it would be Mr. Frelinghuysen and me perhaps alone in the large conference room because the other parties had broken out, what I'll call the parties who -- at least Barclays and Lehman -- who were participating in the transaction.

But I -- I recall at one point,

the estate.

I remember thinking that that basically meant Barclays was getting 72,000 accounts for nothing from the estate. But, again, we were focused on the customer account transfer process and -- and the transaction proceeded.

Q. Were you privy to any other discussions about the DTCC issue? And I exclude internal discussions at Hughes Hubbard or with the Trustee.

A. You know, I do recall early morning hours speaking to Shelly Hirshon at Proskauer, but I -- I just recall that happening. I don't recall any of the specifics. And I know Larry Thompson and some others from DTCC were on and off the phone at various points. So, I guess what I'm
